Give your wheel hub a good clean with your citrus spray or bearing degreaser and check the inside for wear and tear. If everything looks ok, coat the inside of the hub in grease - the more the better, as it'll help the bearings to stay in place. Then, lay your new bearings in place one at a time, spacing them evenly using your finger.

~~**Video - How to Replace a Wheel Bearing | Halfords UK**~~

Start by bolting the new wheel hub assembly to the knuckle and connecting the ABS sensor connector if there was one. Next, torque the bolts to specs, which can be found online or in the vehicle's service manual. Install the rotor back onto the hub and start reassembling the brakes.

~~**How to Replace a Wheel Hub Assembly | YourMechanic Advice**~~

Choke the wheel that is diametrically opposite. • Loosen the wheel nuts by one full turn – but don't fully remove them yet! • Fit the jack under the designated jacking point on your car and slowly wind the jack up until the tyre you want to change is 3-4 inches off the floor. • Remove the wheel nuts and the wheel.
