Human biology is an area of study which focuses on the functionality of the body. This is through studying**

the heredities, development, and consciousness of individuals. The social employees are supposed to comprehend the way the body functions in order to enhance their services.

~~Human Biology for Social Workers – Ace Your Course Work~~

Human Biology for Social Workers Social workers, to effectively assess client systems, need to have background knowledge in sociology, psychology, political science, economics and human biology. This course will provide social work students with basic knowledge about human biology that will aid them in assessing client systems and creating intervention plans that have a greater potential to create desired outcomes.

~~Human Biology for Social Workers~~

Sociobiologists rely heavily on genetic determinism, which states that man's body controls his social behaviors and decisions without consideration of the impact of mind and culture. Human and social biology also pays much attention to the development and transference of social characteristics via genetics.

~~What Is Human & Social Biology? | Synonym~~

There is absolutely no hard biology in this textbook, and I'm convinced that it was created for the obligatory "Human Biology for Social Workers" courses that are required for many MSW programs. If you're going to make the class a requirement, then make it a good class and make people do the hard work!
