International trade enables an LDC to get beyond its PPC and improve its welfare. It can consume more than what it is capable of producing through specialisation and exchange. An LDC can improve its well-being by specialising in and exporting the relatively less expensive domestic goods and importing goods which are relatively more expensive.

Trade as an Engine of Economic Growth | Economics

Trade as an engine of growth: Prospects and lessons for Europe Speech by Benoît Cœuré, Member of the Executive Board of the ECB, NBRM High Level International Conference on Monetary Policy and Asset Management, Skopje, 16 February 2018. I thank you for inviting me to speak here in Skopje today . I would like to take this opportunity to discuss an issue which I believe is key for the economic future of Europe and particularly relevant here, in the Western Balkans: the prospects for trade ...

Trade as an engine of growth: Prospects and lessons for Europe

The classical and neoclassical economists believed that international trade played a vital role in accelerating economic growth of the countries. In fact they called international trade as an 'engine of economic growth'. The contribution of trade to economic growth, according to them, is determined partly from static and partly from dynamic gains that flow from foreign trade.

International Trade and Economic Growth | Economics

More economists believe that trade is the engine of development in modern societies. They claim that international trade creates possible of benefiting from the potential economic empowerment, according to available relative advantages and reveals clear signs for investment in the lucrative economic projects in the global arena.
