There are hundreds of records that I have loved over the course of my life. Some of these records have faded into the depths of my subconscious. Fortunately, most of them have stayed with me year after year remaining fresh in my memory, alive in my heart. I compiled my first “Favorites List” in 1983, and it contained about 600 recordings. Most of the records on the original list are still there today. My current list consists of about 900 recordings. And the list is still growing as I continue to be introduced to more music. Rolling Stone's 2004 cover story, "The 500 Greatest Songs of All-Time." This is certainly a comprehensive compendium on the subject, so why should I bother writing this book? Because I'm taking a different approach, a personal approach. There's a difference between the "greatest songs" as determined by professional music critics, and someone's "favorite records." I'm not a music critic or a musicologist. I'm just a guy who loves good music. Nonetheless, I believe my opinions have value because of the strong connection I have with each record. The primary purpose of this book is to draw us together using our favorite music as the catalyst. In the process of getting to know someone, a

### A Cure For Gravity

Beth is an albino, half blind, and given to looking at the world out of the corner of her eye. Her neighbours in the Derbyshire town of Blackmoor have always thought she was 'touched', and when a series of bizarre happenings shake the very foundations of the village, they are confirmed in their opinion that Beth is an ill omen. The neighbours say that Beth eats dirt from the flowerbeds, and that smoke rises from her lawn. By the end of the year, she is dead. A decade later her son, Vincent, treated like a bad omen by his father George is living in a pleasant suburb miles from Blackmoor. There the bird-watching teenager stumbles towards the buried secrets of his mother's life and death in the abandoned village.

In this book, John Mulhern III writes about traveling a total of 7,694 miles in 18 days-a route through eighteen widely (and wildly) different states including not only stops in the the cities of Chicago, Santa Fe, Los Angeles, San Francisco, and Seattle, but also nights in the small towns of Claremore, Point Arena, and Murdo.

Adventures on the road (multiple encounters with both high winds and snow) yield to visits with friends old and new, encounters with various other Corvettes and other vehicles of interest, and more than a few great restaurants, sometimes in the most unexpected places.

This is a book for travel lovers and most certainly for Corvette lovers, but most of all for devotees of the stunning beauty and endless variety of America. It includes several detailed maps of the route, an annotated bibliography, and over 150 color photos.

Joe Jackson is a singer, songwriter, composer, and performer who has twisted and turned his career through numerous genres, and continues to release excellent albums forty years after his initial breakthrough success. For some he's the 'Angsty Young Man', forever hitched to two hit singles; 'Is She Really Going Out With Him?', and 'It's Different For Girls'. Other memories may extend further to include the smooth pop gems of 'Steppin' Out' and 'Breaking Us In Two' from the early 1980's. By the 1990's he had apparently faded from the spotlight. Stardom has never seemed to be the Jackson's central ambition; he's been happier to follow his muse. There is more, so much more to this gifted musician, and this book covers every facet of a brilliant, unpredictable, and fearsomely independent recording career. solutions of the Ricci flow and related topics. In dimension 3, Perelman completed Hamilton's program to prove Thurston's geometrization conjecture. In higher dimensions the Ricci flow has remarkable properties, which indicates its usefulness to understand relations between the geometry and topology of manifolds. This book discusses recent developments on gradient Ricci solitons, which model the singularities developing under the Ricci flow. In the shrinking case there is a surprising rigidity which suggests the likelihood of a well-developed structure theory. A broader class of solutions is ancient solutions; the authors discuss the beautiful classification in dimension 2. In higher dimensions they consider both

ancient and singular Type I solutions, which must have shrinking gradient Ricci soliton models. Next, Hamilton's theory of 3-dimensional nonsingular solutions is presented, following his original work. Historically, this theory initially connected the Ricci flow to the geometrization conjecture. From a dynamical point of view, one is interested in the stability of the Ricci flow. The authors discuss what is known about this basic problem. Finally, they consider the degenerate neckpinch singularity from both the numerical and theoretical perspectives. This book makes advanced material accessible to researchers and graduate students who are interested in the Ricci flow and geometric evolution equations and who have a
