Neonatal Resuscitation by Dr. Chandrakala *BWH NRP: ELBW Skills Station Review*

NRP Overview and Review by ACLS Certification Institute ~~Latest Nrp Guidelines~~

Positive pressure ventilation remains the foundation of neonatal resuscitation. Resuscitation and life support guidelines for neonatal and pediatric patients have been updated to reflect the latest evidence to improve care. Pediatric Basic and Advanced Life Support and Neonatal Resuscitation are parts 4 and 5 of the 2020 American Heart Association Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care released Oct. 21 and published in Pediatrics (see resources).

~~Welcome to NRP~~

Revisiting the Latest NRP Guidelines for Meconium: Searching for Clarity in a Murky Situation. First, do no harm. To intubate or not to intubate an infant born through meconium-stained amniotic fluid (MSAF) has been a question that has challenged this often-quoted principle of first doing no harm, with the answer evolving significantly since the publication of the first Neonatal Resuscitation Program (NRP) guidelines >30 years ago. 1 Those who trained and practiced in the 1980s and 1990s ...

~~Revisiting the Latest NRP Guidelines for Meconium ...~~

- The 2017 NRP guidelines recommend a 30- to 60-second delay in clamping in all term and preterm infants not requiring resuscitation.
- If the placental circulation is disrupted (e.g., placental abruption), the cord should be clamped immediately. Investigators found that delayed clamping reduced mortality before discharge.

2017 NRP Major Changes Oxygen Use: Infants > 35 weeks gestation begin with 21% oxygen (room air). Infants < 35 weeks gestation resuscitation should begin w/ 21%-30% FiO₂ to maintain appropriate target preductal oxygen saturations. (Class I, LOE B-R) Initiating resuscitation w/ higher than 65% FiO₂ is not recommended. (Class

teach an evidence-based approach to newborn care and facilitate effective team-based care for healthcare professionals who care for newborns at the time of delivery.

~~Neonatal Resuscitation Program | HealthStream~~

- AAP requires renewal of Provider status every 2 years
 - All learners may practice all skills. NRP is not a certification course.
 - Recommended instructor to learner ratio at a Provider course is 1:3-4
- Ventilation of the lungs is the single most important and most effective step in cardiopulmonary resuscitation of the compromised newborn.

~~Newborn Resuscitation: The Science of NRP 7th Edition~~

- Revisions include:
- Begin the resuscitation with antenatal counseling (when appropriate) and a team briefing and equipment check.
 - Maintain the newborn's normal body temperature during resuscitation.
 - Consider using a cardiac monitor when PPV begins.
 - Ensure ventilation that inflates and moves the chest.

~~Summary of the Revised Neonatal Resuscitation Guidelines~~

and other aspects of neonatal resuscitation continue to evolve, the development of skills and practice surrounding PPV should be

emphasized. • Supplemental oxygen should be used judiciously, guided by pulse oximetry. • Prevention of hypothermia continues to be an important focus for neonatal resuscitation. The

~~Part 5: Neonatal Resuscitation~~

The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored with the American Heart Association (AHA). The course conveys an evidence-based approach to care of the newborn at birth and facilitates effective team-based care for healthcare professionals who care for newborns at the time of delivery.
