*Designing Museum Experiences is a "how-to" book for creating visitor-centered museums that emotionally and intellectually connect with museum visitors, stakeholders, and donors. Museums are changing from static, monolithic, and encyclopedic institutions to institutions that are visitor-centric, with shared authority that allows museum and visitors to become co-creators in content creation. Museum content is also changing, from static content to dynamic, evolving content that is multi-cultural and transparent regarding the evolution of facts and histories, allowing multi-person interpretations of events. Designing Museum Experiences leads readers through the methods and tools of the three stages of a museum visit (Pre-visit, In-Person Visit, and Post-visit), with a goal of motivating visitors to return and revisit the museum in the future. This museum visitation loop creates meaningful intellectual, emotional, and experiential value for the visitor. Using the business-world-proven methodologies of user centered design, Museum Visitor Experience leads the reader through the process of creating value for the visitor. Providing consistent messaging at all touchpoints (website, social media, museum staff visitor services, museum signage, etc.) creates a trusted bond between visitor and museum. The tools used to increase understanding of and encourage empathy for the museum visitor, and understand visitor motivations include: Empathy Mapping, Personas, Audience segmentation, Visitor Journey Mapping, Service Design Blueprints, System Mapping, Content Mapping, Museum Context Mapping, Stakeholder Mapping, and the Visitor Value Proposition. In the end, the reason for using the tools is to empower visitors and meet their emotional and intellectual needs, with the goal of creating a lifelong bond between museum and visitor. This is especially important as museums face a new post COVID-19 reality; only the most nimble, visitor-centered museums are likely to survive. The companion website to Designing Museum Experiences features: Links to additional visitor-centered museum information Downloadable sample documents and templates Bibliography of sources for further reading Online glossary of museum visitor experience terms Daily checklists of "how-to" provide and receive visitor-centered experiences More than 50 associated Designing Museum Experiences documents*

*Angels are beings of an exalted order. For the most part their activity goes beyond the scope of everyday human concerns. Yet many of us have felt their presence. Socrates had his daemon. William Blake received artistic guidance from his departed brother. Spirit guides are frequently termed guardian angels, but it's much more accurate to describe them as helpers and comforters, mentors and companions. Laeh Maggie Garfield, nationally known teacher and healer, says her own spirit helper promises "faith, love, creativity, joyous self-expression and the flow of abundance" in this fascinating introduction to working with your own guardian angel and other spirit companions.*

Legendary Maine Guide Award winner Gil Gilpatrick has been a Master Maine Guide for over 40 years, and has guided commercially for much of that time. In this book readers will gain the benefit of his experience, as well as that of several other respected guides and outdoor professionals who have contributed their expertise. This is a book that helps leaders to help others, with field-tested advice for successfully leading any camping, hiking, canoeing or hunting trip. The reader is taken through each step in the planning and conduct of a successful outdoor expedition. Special emphasis is placed on preparations to ensure the safety and well being of those people for whom the leader is responsible. Covering a wide range of important topics in one short, easy to understand volume, Gil's useful checklist system provides guidance on what to pack and how to pack it, supplemented by his best trail recipes. Special chapters focus on dealing with cold or wet weather, while other chapters provide essential advice on how to prevent injuries or losing people, and what to do if either of those should happen. Learn the science and art of creating a one-of-a-kind bamboo fly rod. Fly fishing has a long and storied history. While many flyfishermen will find and purchase their favorite fly rod, there are those who desire to go a step further. For those discerning flyfishermen and women, simply buying a rod is not enough—they must build one. And just as fly fishing is an art, so is the creation of the bamboo fly rod. Many people believe that the best-feeling rods, particularly for trout fishing, are made from bamboo, and today's bamboo rod-making tradition is particularly indebted to one man: Everett E. Garrison. Using principles he learned as an engineering student, Garrison created an exacting method of building rod—a method that for decades was a well-kept secret. These techniques are presented to the reader in *A Master's Guide to Building a Bamboo Fly Rod*, a classic volume written by Hoagy B. Carmichael to honor and maintain Garrison's legacy. Completely illustrated with black-and-white drawings and over three hundred and sixty black-and-white photographs, along with copious notes on the mathematical and engineering principles that underlie Garrison's unique rod-making technique, this book will guide you through each step of creating a classic bamboo fly rod. Skyhorse Publishing is proud to publish a broad range of books for fishermen. Our books for anglers include titles that focus on fly fishing, bait fishing, fly-casting, spin casting, deep sea fishing, and surf fishing. Our books offer both practical advice on tackle, techniques, knots, and more, as well as lyrical prose on fishing for bass, trout, salmon, crappie, baitfish, catfish, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

Although many books explore the ramifications of managed care for psychotherapy, this is the first to take a broad perspective and examine the ways in which the new health care delivery system is affecting all aspects of practice--not just treatment but also assessment and training--as well as mental health research. The authors include some of the country's most noted psychologists with extensive experience in managed care. Their tone is optimistic rather than pessimistic; as they look at developments others have only deplored, they see potential roles and opportunities for growth for psychologists. In an era of dramatic health change, all those practitioners who are concerned about how to make managed care work for them rather than against them, will find this Guide essential reading.
