Worldwide, 24% of countries that reported to the WHO's 2014 Mental Health Atlas survey did not have or had not implemented standalone mental health policies; in Africa, this proportion rose to 46%. The region has 1.4 mental health workers per 100 000 people, compared with a global average of 9.0 per 100 000, and also performs relatively poorly with regard to the number of psychiatrists, the number of hospital beds for patients with mental illness, and the coverage of outpatient facilities.

Mental health in Africa - The Lancet Global Health

In Africa as in Europe, North America, South America, Asia, and Oceania, the advantages of diagnostic classification of psychiatric disorders include: (1) a means of communication and of ordering clinical material, (2) the management, treatment, and care of patients, (3) prognosis, and (4) the great scientific interest found in discrepancies in the classification, which may form the basis for asking further relevant clinical and research questions.

mental health care and its integration into primary health care services in South Africa, many general health care providers who have not been exposed to patients with men- tal disorders, now have to provide health services to users

RESEARCH ARTICLE Open Access Psychiatric stigma and ...

Mental illness is very prevalent in South Africa, yet the country lacks many of the necessary resources and policies needed to execute an effective mental health strategy. Many factors including violence, communicable disease, and urbanisation have increased the prevalence of mental disorders in the country. The way in which these mental disorders are treated has changed over the years. For a while, mental health care was mainly institutionalised. However, in 1997, following the White Paper Act,
