Walter Nicholson Microeconomic Theory Solution c. Optimal solution is $x_1 = 0, x_2 = 4, y = 5 \ln 4$. Any positive value for x_1 reduces y . d. If $k = 20$, optimal solution is $x_1 = 15, x_2 = 5$. Because x_2 provides a diminishing marginal increment to y whereas x_1 does not, all optimal solutions require that, once x_2 reaches 5, any extra amounts be devoted entirely to x_1 .

Walter Nicholson Microeconomic Theory Solution Manual

d. This would require a solution using the Lagrangian method. The optimal solution requires solving three non-linear simultaneous equations—a task not undertaken here. But it seems clear that the solution would involve a different relationship between t and x than in parts a-c. 2.7 a.

Walter Nicholson Microeconomic Theory Solution c. Optimal solution is $x = 120, x = 4, y = 5 \ln 4$. Any positive value for $x = 1$ reduces y . d. If $k = 20$, optimal solution is $x = 1215, 5$. Because $x = 2$ provides a diminishing marginal increment to y whereas $x = 1$ does not, all optimal solutions require that, once $x = 2$ reaches 5, any extra amounts be devoted entirely to $x = 1$.

Walter Nicholson Microeconomic Theory Solution Manual

d. This would require a solution using the Lagrangian method. The optimal solution requires solving three non-linear simultaneous equations—a task not undertaken here. But it seems clear that the solution would involve a different relationship between t and x than in parts a-c. 2.7 a.

Walter Nicholson-Solutionary Microeconomic theory. 11 ...

walter nicholson microeconomic theory solution Optimal solution is $x = 120, x = 4, y = 5 \ln 4$. Any positive value for $x = 1$ reduces y . d. If $k = 20$, optimal solution is $x = 1215, 5$.
