INTRODUCTION TO MODEL THEORY 19 Proof. If T is not satisfiable, then by Theorem 2.2 there is a proof of a contradiction from T . As proofs use only finitely many assumptions from T there is a finite inconsistent subset of T . An important question when we try to axiomatize the properties of a structure

Introduction to Model Theory - MSRI

1. Introduction Model Theory is the part of mathematics which shows how to apply logic to the study of structures in pure mathematics. On the one hand it is the ultimate abstraction; on the other, it has immediate applications to every-day mathematics. The fundamental tenet of Model Theory is that mathematical truth, like all truth, is relative.
