What is Motivational Interviewing in Patient Care Management?
Motivational Interviewing In Healthcare Helping patients to change behavior and other outcomes Health Care involves not just giving people treatment. They come in with challenges connected to the way they lead their lives.

Motivational Interviewing in Healthcare | Stephen Rollnick
Lecturing at patients and arguing with them to change their unhealthy behaviors is rarely successful. Human nature resists being told what to do. Motivational interviewing, conceived by psychologists for the treatment of alcoholism, is a less confrontational method in which the patient, not the clinician, gives voice to the argument for change.

Motivational Interviewing in Health Care: Helping Patients ...
Motivational interviewing (MI) is a clinical communication skill that nurses can develop to elicit patients' personal motivations for changing behavior to promote health. Nurses can then emphasize these factors in their teaching to help patients modify their behavior.1
