National Geographic Volcano Webquest Answer Key

Then explain to students that there are about 1,500 potentially active volcanoes in the world; 65 of them are in the United States. Tell students that a volcano is classified as active if it is capable of erupting, or sending out rocks, ash, and lava in a sudden explosion.
2. Have students read first-person accounts of volcanic eruptions.

Volcanic Eruptions | National Geographic Society

Volcanoes, like Mauna Loa in Hawaii, are effusive. Rather than a violent explosion, lava pours or flows out. Fatalities from effusive volcanoes are rare because people can usually outrun the lava. However, some people get too close or become trapped with no escape.
