Enterprise Java developers must achieve broader, deeper test coverage, going beyond unit testing to implement functional and integration testing with systematic acceptance. Next Generation Java Testing introduces breakthrough Java testing techniques and TestNG, a powerful open source Java testing platform. Cedric Beust, TestNG's creator, and leading Java developer Hani Suleiman, present powerful, flexible testing patterns that will work with virtually any testing tool, framework, or language.

~~Next Generation Java Testing: TestNG and Advanced Concepts~~

In this tutorial of three articles, my goal is to share knowledge regarding Test Next Generation (TestNG). TestNG is a powerful Test Framework for testing Java code. A Test Framework is a pattern for writing and running Test Scripts. Thanks to xUnit, we have a family of frameworks for testing many programming languages. TestNG is not a part of xUnit

In this course, I will cover Next Generation (TestNG), a Java test framework. You will see why TestNG was designed for developers and automation testers who want to go beyond unit testing. xUnit is a family of Unit Test Frameworks that consists of JUnit for Java, PyUnit for Python, and NUnit for the .Net programming languages such as C Sharp.
