During the 1960s and 70s in Japan, the photobook through a combination of excellence in design, printing, and material overtook prints as a popular mode of artistic dissemination. This process has expanded to an extent where any discussion of Japanese photography now has to include the book work. Today, the most famous works such as Nobuyoshi Araki's *Sentimental Journey* and Eikoh Hosoe's *Man and Woman* continue to inspire artists internationally. *Japanese Photobooks of the 1960s and 70s* presents forty definitive publications from the era, piecing together an otherwise invisible history that has played out in tandem with photography as a medium. Included are some of the most influential works along with forgotten gems, placed within a larger historical and sociological context. Each book, beautifully reproduced through numerous spreads, is accompanied by an in-depth explanatory text and sidebars highlighting important editors, designers, themes, and periodicals. Lavishly produced, this unique publication is an ode to the distinct character and influence of the Japanese photobook.

Globally, child labor and forced labor are widespread and complex problems. They are conceptually different phenomena, requiring different policy responses, though they may also overlap in practice. The Trafficking Victims Protection Act of 2000 (TVPA) was designed to reduce the use of child and forced labor in the production of goods consumed in the United States. The Act was reauthorized in 2003, 2005, and 2008. In response to provisions of TVPA, the the Bureau of International Labor Affairs requested that the National Research Council organize a two-day workshop. The workshop, summarized in this volume, discusses methods for identifying and organizing a standard set of practices that will reduce the likelihood that persons will use forced labor or child labor to produce goods, with a focus on business and governmental practices.

Each book covers all the necessary information a beginner needs to know about a particular topic, providing an index for easy reference and using the series' signature set of symbols to clue the reader in to key topics, categorized under such titles as Tip, Remember, Warning!, Technical Stuff and True Story.

Japanese Photobooks of the 1960s and '70s

This monograph covers a novel technology to deliver drugs and cosmetics through the skin in a minimally invasive manner. Microneedles – a bed of miniaturized needles is one of the most studied topics in delivering actives through the skin barrier. This book enables readers to understand the delivery of ingredients through the skin, describes a novel and simple method to fabricate microneedles containing a range of small and large molecular weight compounds, studies their physical properties as well as delivery through the skin layers. Readers will discover this book to be extremely beneficial to help them understand the state of the field of transdermal drug delivery, with extensive coverage including experimental data on basics of microneedle fabrication technology using photolithography, encapsulation of drugs

within the polymeric matrix of microneedles and studying their release patterns *in vitro* and *ex vivo*. Academic researchers, pharmaceutical and cosmeceutical industry as well as students of skin science will find this account very useful in their pursuits. As microneedles grow and develop into a commercial reality with more actives being delivered and significant clinical research being put in, this account will hold well in providing basic principles and knowledge together with rigorous experimental data.

This collection provides vivid ethnographic explorations of particular, local Christianities as they are experienced by different groups around the world. At the same time, the contributors, all anthropologists, rethink the vexed relationship between anthropology and Christianity. As Fenella Cannell contends in her powerful introduction, Christianity is the critical “repressed” of anthropology. To a great extent, anthropology first defined itself as a rational, empirically based enterprise quite different from theology. The theology it repudiated was, for the most part, Christian. Cannell asserts that anthropological theory carries within it

Download Free Nikon Coolpix S220 Quick Start Guide

ideas profoundly shaped by this rejection. Because of this, anthropology has been less successful in considering Christianity as an ethnographic object than it has in considering other religions. This collection is designed to advance a more subtle and less self-limiting anthropological study of Christianity. The contributors examine the contours of Christianity among diverse groups: Catholics in India, the Philippines, and Bolivia, and Seventh-Day Adventists in Madagascar; the Swedish branch of Word of Life, a charismatic church based in the United States; and Protestants in Amazonia, Melanesia, and Indonesia. Highlighting the wide variation in what it means to be Christian, the contributors reveal vastly different understandings and valuations of conversion, orthodoxy, Scripture, the inspired word, ritual, gifts, and the concept of heaven. In the process they bring to light how local Christian practices and beliefs are affected by encounters with colonialism and modernity, by the opposition between Catholicism and Protestantism, and by the proximity of other religions and belief systems. Together the contributors show that it not sufficient for anthropologists to assume

that they know in advance what the Christian experience is; each local variation must be encountered on its own terms. Contributors. Cecilia Busby, Fenella Cannell, Simon Coleman, Peter Gow, Olivia Harris, Webb Keane, Eva Keller, David Mosse, Danilyn Rutherford, Christina Toren, Harvey Whitehouse

"This book offers a mechanistic approach to the study of ocean ecology by exploring biological interactions in plankton at the individual level. The book focuses on encounter mechanisms, since the pace of life in the ocean intimately relates to the rate at which encounters happen." "Most of the book's chapters consist of a
