Nlp

Knowledge

Management is a wide, critical and strategic issue for all the com- nies, from the SMEs to the most complex

organizations. The key of competitiveness is knowledge, because of the necessity of reactivity, flexibility, agility and innovation capacities.

Knowledge is difficult to measure itself but what is

Bookmark File
PDF Nlp Pattern
To Be Mature

was possible and realistic because the partners were representative of the most important universities in Europe and also because of strong partnerships with laboratories far from Europe (Japan, Australia, South

Africa, USA, etc...).

Based on such powerful partnership, the main issue was to help European manufacturing industry to define and structure the strategic knowledge in order to face the strategic worldwide

challenges.

Manufacturing in Europe currently has two essential aspects: 1. It has to be knowledge intensive given the European demands for high-tech products and services (e.g. electronics,

medicines).

The Natural
Language
Processing (NLP)
track was organized
for the first time at

TREC-5 to provide a more focused look at how NLP techniques can improve performance in information retrieval (IR). The intent was to see if the NLP techniques available today are mature enough to have an impact on IR, and

whether they offer an advantage over purely quantitative methods. TREC-5 also was the place to try more expensive and more risky solutions than those used in main TREC evaluations. This NLP track demonstrated that

Bookmark File
PDF Nlp Pattern
To Be Mature
Book

NLP techniques have a solid but limited impact on the quality of text retrieval, particularly precision.

Techniques aimed at producing higher quality queries, (e.g., query expansion, constraints) appear to be more effective

than those aimed primarily at obtaining improved indexing of database documents. More work is needed before substantial gains can be seen, including the use of more advanced and expensive semantic analysis techniques.

Figure 2 summarizes the NLP techniques that have been tried in information retrieval, and what their potential might be for improving retrieval precision.

This chart was discussed at the NLP track workshop on the last day of

TREC-5. The consensus was that NLP techniques that show particular promise in relatively small-scale track evaluations should be transferred to main evaluations as soon as practical. This book constitutes the
