Oracle Database 12c Release 2 for Windows Downloads
Native dynamic SQL processes most dynamic SQL statements with the EXECUTE IMMEDIATE statement.. If the dynamic SQL statement is a SELECT statement that returns multiple rows, native dynamic SQL gives you these choices:. Use the EXECUTE IMMEDIATE statement with the BULK COLLECT INTO clause.. Use the OPEN FOR, FETCH, and CLOSE statements.. The SQL cursor attributes work the same way after native ...

PL/SQL Dynamic SQL - Oracle
Oracle processes hierarchical queries as follows: A join, if present, is evaluated first, whether the join is specified in the FROM clause or with WHERE clause predicates.. The CONNECT BY condition is evaluated.. Any remaining WHERE clause predicates are evaluated.. Oracle then uses the information from these evaluations to form the hierarchy using the following steps:

Hierarchical Queries - Oracle
Oracle Database PL/SQL Packages and Types Reference for more information about the DBMS_XPLAN package Scripting on this page enhances content navigation, but does not change the content in any way.

V\$SQL - Oracle

Oracle determines the argument with the highest numeric precedence and implicitly converts the remaining arguments to that data type. The return type is also that data type, unless otherwise noted for an individual function.

Analytic Functions - Oracle

We officially support Oracle JDK 8 or 11. If SQL Developer cannot find Java on your machine, it will prompt you for the path for a JDK home. This only occurs the first time you launch SQL Developer. A valid Java Home on Windows will be similar to . C:\Program Files\Java\jdk1.8.0_181.

Oracle SQL Developer Downloads

For Top-N queries, Oracle Database 12c introduces a new clause, FETCH FIRST, to simplify the code and comply with ANSI SQL standard guidelines. The clause is used to limit the number of rows returned by a query. The new clause can be used in conjunction with ORDER BY to retrieve Top-N results.
