This Publication is the second in the European Procurement Law Series. European institutions have developed common principles and rules which are applicable all over the EU. While in some cases rules and practice from some Member States may have influenced the developments of public procurement law at EU level, European provisions will more often be divergent from the rules previously in force in most Member States. Once they

penetrate the domestic legal orders, the sources of European law interact with national law. The Series will explore how and to what extent the national laws of a number of Member States have tried to accommodate European rules and principles. The Main Objective of public procurement regulation is to provide the government with the supplies, services, and works it needs to operate. This primary objective is connected to the principle of value for money and for the European Union with the aim to ensure the functioning of the internal market in public procurement. However, other objectives related to environmental and social concerns have always played a role as well. These range from the award of contracts to workshops for the disabled to strict environmental specifications. These 'secondary' or 'horizontal' objectives, also referred to as 'green procurement', 'sustainable procurement' or 'social procurement', are the subject of this book. The analysis covers the European Union internal market law of green and social procurement with emphasis on the interpretation, implementation and practice in a range of Member States of the EU and includes a comparative study.

The inspiration behind the hit podcast THE 100 TYPES OF HUMAN with DEXTER DIAS and BBC 5 Live host NIHAL ARTHANAYAKE 'This book is the one. Think Sapiens and triple it.' - Julia Hobsbawm, author of Fully Connected

_____ We all have ten types of human in our head. They're the people we become when we face life's most difficult decisions. We want to believe there are things we would always do - or things we never would. But how can we be sure? What are our limits? Do we have limits? The Ten Types of Human is a pioneering examination of human nature. It looks at the best and worst that human beings are capable of, and asks why. It explores the frontiers of the human experience, uncovering the forces that shape our thoughts and actions in extreme situations. From courtrooms to civil wars, from Columbus to child soldiers, Dexter Dias takes us on a globe-spanning journey in search of answers, touching on the lives of some truly exceptional people. Combining cutting-edge neuroscience, social psychology and human rights research, The Ten Types of Human is a provocative map to our hidden selves. It provides a new understanding of who we are - and who we can be. _____

'The Ten Types of Human is a fantastic piece of non-fiction, mixing astonishing real-life cases with the latest scientific research to provide a guide to who we really are. It's inspiring and essential.' - Charles Duhigg, author of The Power of Habit 'I emerged from this book feeling better about

almost everything... a mosaic of faces building into this extraordinary portrait of our species.' - Guardian 'Uplifting and indispensable.' - Howard Cunnell

Despite the emphasis of the European Regional Policy on territorial cohesion, regional disparities have been increasing within Europe in the past years. The metropolitan areas in almost all countries are considerably growing while regions outside of agglomerations

are stagnating or even declining. Against this background this book aims to provide an understanding of the underlying processes of polarisation and related regional and local policies. This open access volume contributes to the debates about polarisation and regional development by focussing on questions of spatial justice, power distribution and policy transfer. Theoretical and empirically grounded contributions show that European policies are indeed reproducing socio-spatial inequalities instead of challenging them. The book shows further the existing potentials and limits of individuals, economic, political and civil society actors to respond to polarisation on the regional and local level. In this book conceptual thoughts on polarisation, regional policy and regional development are combined with empirical research and resulting implications for policymaking. As such, it is a valuable source for early career students and researchers as well as professionals in the field of regional and economic development, policy consultants, and policy makers.

When I first met Blake Crawford, all I wanted to do was hit him in the face. Maybe the groin. Okay, maybe I wanted to kiss him too, but that's neither here nor there. I mean, he may have a gorgeous English accent, sexy full lips and an ass I'd like to bite but... Where was I? Right. Being in the same creative writing class, he's the last person I wanted to speak to, let alone be paired up with for my final assignment. But here comes the kicker...not only did our project end up getting us both As but we found out we work well together. Really well together. I hate him and he hates me and yet we churn out gold. Marduk King of Earth

MARDUK: ANUNNAKI KING OF EARTH By Sasha Alex Lessin, Ph.D. (Anthropology) & Janet Kira Lessin CEO, Aquarian Radio Marduk, Our secret Anunnaki ruler, says he'll make amends for suffering he caused. Anu, legal successor to planet Nibiru King Lahma, signed a treaty with King Alalu who slew Lahma. Anu quit as Lahma's successor and agreed to let his and Alalu's grandson Marduk succeed Alalu. Anu however reneged. He abrogated the treaty, deposed Alalu and denied Marduk Nibiru's Crown. Marduk rocketed to Earth where he joined his father Enki, Chief Scientist, Earth Goldmining Expedition (the Anunnaki). Marduk didn't rule Nibiru; he only, for awhile, ruled the Astronaut Corps (Igigi) on Mars. He wed a Hybrid (Sarpanit) whose ancestors his dad created. He built Babylon for both Anunnaki and Hybrids in Iraq. Marduk backed the Igigi after they abducted hybrid women following his wedding. He helped settle them on Earth. The Igigi and the lineages they bred with the slave-women, allied with him, settled in Jerico, Canaan and Egypt. In 3450 BCE Anunnaki Commander Enlil-Yahweh had his son Ninurta bomb Marduk's Babylon. In 2924 BCE Ninurta nuked the Expedition's Sinai Spaceport to deny it to Marduk. Marduk's brother

Nergal bombed Sodom, Gomorra and the Salt Sea's south bank to kill Marduk's son Nabu. To Enlil's shock, a radioactive storm blew from the bombs he'd ordered dropped and also killed his Sumerian Earthlings. Enlil left Earth rule to Marduk.

The remarkable story of the Finnish marksman nicknamed “White Death” by the Red Army for his record number of confirmed kills. Simo Häyhä is the most famous sniper in the world. During the Winter War fought between Russia and Finland from 1939 to 1940, he had 542 confirmed kills with iron sights, a record that still stands today. A man of action who spoke very little, Simo Häyhä was hugely respected by his men and his superiors and given many difficult missions, including taking out specific targets. Able to move silently and swiftly through the landscape, melting into the snowbound surroundings in his white camouflage fatigues, his aim was deadly and his quarry rarely escaped. The Russians learned of his reputation as a marksman and tried several times to kill him by indirect fire. He was promoted from corporal to second lieutenant, and he was awarded the Cross of Kollaa. For sniping, Simo Häyhä only ever used his own M/28-30 rifle. Eventually, his luck ran out, and Simo received a serious head wound on March 6, 1940, though he subsequently recovered. The White Sniper fully explores Simo Häyhä’s life, his exploits in the Winter War, the secrets behind his success, including character and technique, and also includes a detailed look at his rifle itself. There are appendices on the basics of shooting, the impact of fire on the battlefield, battles on the Kollaa Front during the Winter War, and a list of ranked snipers of the world. “No matter how many books on sniping you have read, this must be added to your list if you are serious about shooting.” —GunMart

This book explores various approaches around the world regarding price term control, and particularly discusses the effectiveness of two major paths: ex ante regulatory and ex post judicial intervention. Price control and its limits are issues that affect all liberal market economies, as well as more regulated markets. For the past several years, courts in many different countries have been confronted with the issue of whether, and to what extent, they should intervene regarding price-related terms in standard form contracts – especially in the area of consumer contracts. Open price clauses, flat remunerations, price adjustment clauses, clauses giving the seller/supplier the right to ask for additional payments, bundling or partitioning practices, etc.: a variety of price related terms are used to manipulate customers' choices, often also by exploiting their behavioral biases. The result is an unfavorable contract that is later challenged in court. However, invalidating a given price term in standard forms e.g. of a banking or utilities contract only has an inter partes effect, which means that in thousands if not millions of similar contracts, the same clauses continue to be used. Effective procedural rules are often lacking. Therefore, pricing patterns that serve to hide rather than to reveal the real cost of goods and services require special attention on the part of regulators. The aim of this book is to determine the various approaches in the world regarding price term control, and particularly to discuss the efficiency of both paths, ex ante regulatory and ex post judicial intervention. Thanks to its broad comparative analysis, this book offers a thorough overview of the methods employed in several countries. It gathers twenty-

eight contributions from national rapporteurs and one supra-national rapporteur (EU) to the 2018 IACL Congress held in Fukuoka. These are supplemented by a general report presented at the same IACL Congress, which includes a comparative analysis of the national and supranational reports. The national contributors hail from around the globe, including Africa (1), Asia (5), Europe (17), the European Union (1) and the Americas (5).

Looks at the regulatory environment relating to the informal economy at the international and national levels, with

examples of existing laws and practice from different regions, legal systems, traditions and circumstances adopted by ILO constituents to ensure a progressive transition to the formal economy. Examines the need for an integrated policy framework, encompassing the ILO's four strategic objectives (fundamental principles and rights at work, employment, social protection and social dialogue) adapted to the national context of each member State for a progressive transition to the formal economy and decent work.

Most procurement contracts passed in the European Union escape the full rigor of the application of the 2004 directives, since they are either below the threshold or concern non-priority services. However, the Court of Justice has held that the general principles of non-discrimination and transparency apply to contracts which - because of their subject matter, value, or other characteristics - present a cross-border interest. EU Member States

and procuring entities have been given some guidance - by the case law and the Commission - on what is needed to comply with the said principles, but for the most part they themselves have to fill in the blank spaces in the regulatory framework. This book provides information on how a number of relevant jurisdictions in the EU have responded to the call by the Court of Justice, highlighting both best practices and areas of uncertainties. A chapter on the EU legal framework and a number of comparative chapters help in understanding both the requirements imposed by the EU case law as well as the developing trends at the national level, which are to influence the next generation of procurement directives. The Unfair Commercial Practices Directive is the most important directive in the field of trade practices to have emerged from the EC but it builds upon European activity which has sought to regulate trade practices on both a sectoral and horizontal level. It is an umbrella provision, which uses general clauses

to protect consumers. How effective this approach is and how it relates the existing acquis are fundamental issues for debate. This work provides a critical appraisal of the Unfair Commercial Practices Directive linking discussion of it to general debates about how fair trading should be regulated. It explains how the Directive fits into the existing acquis. It also examines national traditions where these are necessary to explain the European approach, as in the case of general clauses. The book will be a valuable tool for any student of consumer law seeking to understand the thinking behind the directive and how it will affect national laws. It will also influence policy makers by suggesting how the directive should be interpreted and what policy lies behind its formulation. Businesses and their advisers will use the book as a means of understanding the new regulatory climate post-the directive.

Since the financial crisis of 2008, the major governments of the world have resorted to printing large amounts of money to pay national debts and bail out banks. The warning signs are clear, and the collapse of the Zimbabwean dollar after years of rampant money printing is a frightening example of what lies in store for world economies if painful reform is not executed. When Money Destroys Nations tells the gripping story of the disintegration of the once-thriving Zimbabwean economy and how ordinary people survived in turbulent circumstances. Analysing this case within a global context, Philip Haslam and Russell Lamberti investigate the causes of hyperinflation and draw ominous parallels between Zimbabwe and the world's developed economies. The looming currency crises and hyperinflation in these major economies, particularly the United States, have the potential to turn the current world order upside down. This story of how money destroys nations holds lessons that cannot be ignored.
