Scientific Revolution - Scientific Revolution - Physics: The battle for Copernicanism was fought in the realm of mechanical astronomy. The Ptolemaic-Aristotelian system stood or fell as a monolith, and it rested on the idea of Earth's fixity and the cosmos. Removing Earth from the centre destroyed the doctrine of natural motion and place, and circular motion.

~~Scientific Revolution - Physics | Britannica~~

Since the 17th century, philosophers have been struggling with the implications science has for classical philosophy. In a way, the relationship between science and philosophy is one that has always occurred in Western philosophy; Socrates, Aristotle, and also the medievals grappled with science and what relation it had to philosophy, but with the appearance of modern science ...

~~Physics and Philosophy : The Revolution in Modern Science~~

Scientific Revolution, drastic change in scientific thought that took place during the 16th and 17th centuries. A new

emerged during the Scientific Revolution, replacing the Greek view that had dominated science for almost 2,000 years. It became an autonomous discipline, distinct from both philosophy and technology, and it came to be regarded as having its own goals.

~~Scientific Revolution | Definition, History, Scientists ...~~

The Scientific Revolution. The scientific revolution was the emergence of modern science during the early modern period. Developments in mathematics, physics, astronomy, biology (including human anatomy), and chemistry transformed scientific thought about nature.
