Polymers—or macromolecules—are the long molecular chains that provide the building blocks for all the matter in the world that isn't metal or ceramic. And when it comes to studying them, the Department of Macromolecular Science and Engineering at Case Western Reserve defines the field. Not only were we the first school in the country to offer an ABET-accredited Bachelor of Science program in polymer science, we were the first to establish a stand-alone department dedicated to the ...

Introducing the Akron Polymer Student Endowed Scholarship. Faculty members in the School of Polymer Science and Polymer Engineering (SPSPE) take tremendous pride in the work their students produce, and they go to great lengths in providing monies via grants to provide them with support. On occasion, a student will need more time to complete their degree than what was planned, or a grant may not be renewed, leaving faculty members and students in a financial dilemma.
