minimized in the healthy pet. It is our job to ensure that your pet can properly process and eliminate the anesthetics he/she is given. We perform pre-anesthetic testing to confirm that your pet's organs are functioning properly and to help reveal any hidden health conditions that could put your pet at risk both during and after the anesthetic

Pre-Anesthetic Testing - All Pets Veterinary Hospital
Pre-anesthetic testing provides pet parents with peace of mind about their fur baby's anesthesia and surgical procedure. Combined with a thorough patient history and complete physical examination, some simple and non-invasive blood and urine tests help screen pets for health issues that may affect their ability to tolerate anesthesia.

Pre-Anesthetic Testing – Is It Really Necessary?

Blood testing prior to your pet being admitted for their anaesthetic will allow for any further testing required to be performed and prevent any delay on the day itself. In most cases, blood testing is best performed with your pet starved to give the most accurate results.
