The Graphs and Models series by Bittinger, Beecher, Ellenbogen, and Penna is known for helping students “see the math” through its focus on visualization and

technology. These texts continue to maintain the features that have helped students succeed for years: focus on functions, visual emphasis, side-by-side algebraic and graphical solutions, and real-data applications.

Precalculus: Graphs and Models, A Right Triangle Approach ...

In both graphs, the shape of the graph repeats after 2π , which means the functions are periodic with a period of 2π . A periodic function is a function for which a specific horizontal shift, P , results in a function equal to the original function: $f(x + P) = f(x)$ for all values of x in the domain of f .
