Air conditioners and refrigerators are devices used to keep a space at a colder temperature than its surroundings. The main difference between refrigeration and air conditioning is that refrigeration, in general, refers to any process where thermal energy is taken away from a place and transferred to a place with a higher temperature.

~~Difference Between Refrigeration and Air Conditioning~~

Vapour Compression Refrigeration Cycle is the most widely used refrigeration system. In this system, the working fluid is a vapor. It readily evaporates and condenses or changes alternatively between the vapor and liquid phase without leaving the refrigerating plant.

~~Refrigeration and Air Conditioning Notes [With PDF]~~

Refrigeration & Air Conditioning Magazine (RAC) is the leading journal in the industry. It will keep you on top of all the latest news, views, moves and events in the cooling industry.

~~RAC Magazine - Refrigeration & Air Conditioning News ...~~

Focussing on the practical skills and knowledge required to install, service and maintain refrigeration and air-conditioning systems, on successful completion of this qualification the learner will be well equipped to start or progress their career in the refrigeration & air-conditioning industry.

~~Refrigeration and Air Conditioning qualifications and ...~~

About Refrigeration and air conditioning Refrigeration may be defined as the process of achieving and maintaining a temperature below that of the surroundings, the aim being to cool some product or space to the required temperature.

~~Refrigeration and air conditioning based mechanical projects~~

Air conditioning systems with precise close control for high reliability, better humidity and temperature control in IT cooling, in server rooms or data centers.

~~Advanced refrigeration and air conditioning solutions ...~~

What does a refrigeration and air conditioning engineer do? Refrigeration and air-conditioning (RAC) engineers design, install and maintain cooling systems in buildings like supermarkets, offices, schools, hospitals and food processing plants. Your work could cover one of two broad areas:

Refrigeration - Air Conditioning - Ventilation Service And Maintenance We Pride our selves with providing the best customer service possible, with 24 hour 7 days a week cover, we understand that customers rely on their air conditioning, commercial refrigeration or ventilation equipment to keep there businesses in operation,

~~Award Refrigeration -- Refrigeration, Air Conditioning~~

Refrigeration has many applications, including household refrigerators, industrial freezers, cryogenics, and air conditioning. Heat pumps may use the heat output of the refrigeration process, and also may be designed to be reversible, but are otherwise similar to air conditioning units.

~~Refrigeration -- Wikipedia~~

Air conditioning is often part of a larger heating and cooling system. In many ways air conditioning and refrigeration systems are very similar. Both use specially designed chemicals, the physical effects of the compression and expansion of gases, and the conversion of gas to liquid to reduce the temperature of air.

~~Differences Between Air Conditioning & Refrigeration | Hunker~~

Modern Refrigeration and Air Conditioning is the standard for a new generation of learners. This classic is an excellent blend of theory, skill development, and service techniques to help students learn how to install and service refrigeration and HVAC systems. Technical content has never been more up to date. A logical and progressive organization, rich learning pedagogy and features, a ...

~~Modern Refrigeration and Air Conditioning (Modern ...~~

The heating, ventilation, air-conditioning and refrigeration industry (HVAC&R) is growing, driven by population growth, globalisation, consumer trends and climate change. Air-conditioning and Refrigeration professionals cover both electrical and mechanical areas, so careers are unique and varied.

~~Air-conditioning and Refrigeration Courses -- TAFE NSW~~

Our Refrigeration & Air Conditioning courses are delivered in excellent workshop environments allowing you to experience your chosen trade as you would in industry. Courses are taught by staff who are all industry qualified and will use their experience to give you the best support and start to your future.
