You use a regular expression in the script dialer command to specify the name of the chat script that the Cisco IOS software is to execute on a particular asynchronous line. You can also use regular expressions in the dialer map command to specify a "modem" script or "system" script to be used for a connection to one or multiple sites on an asynchronous interface.

Regular Expressions - Cisco

A regular expression is entered as part of a command and is a pattern made up of symbols, letters, and numbers that represent an input string for matching (or sometimes not matching). Matching the string to the
