The security guide provides an overview of the security-relevant information that applies to SAP NetWeaver PI. It contains an overall overview of security with SAP NetWeaver as well as links to the individual guides for each of the SAP NetWeaver PI components, standalone engines, connectivity and interoperability technologies, database and operating system platforms and the various scenarios.

### ~~SAP Library – Security Guide~~

SAP security is a balancing act that involves all the tools, processes, and controls set in place in order to restrict what users can access within an SAP landscape. This helps ensure that users only can access the functionality they need to do their job. They should be prevented from viewing or altering data they aren't authorized to see.

### ~~Complete SAP Security Basics Guide: What You Need to Know ...~~

Protecting the SAP System Super User. To protect a SAP System Super User “SAP”, you can perform the following steps in a system – . Step 1 – You need to define the new Super User in a SAP system and deactivate the SAP user. Note that you must not delete user SAP in the system.
