Single Particle Tracking Based Reaction Progress Kinetic

Single-particle tracking is the observation of the motion of individual particles within a medium. The coordinates time series, which can be either in two dimensions or in three

Read Free Single Particle Tracking Based Reaction Progress Kinetic

dimensions, is referred to as a trajectory. The trajectory is typically analyzed using statistical methods to extract information about the underlying dynamics of the particle. These dynamics can reveal information about the type of transport being observed, the medium where the particle is moving, and interactions with
