~~Math Questions With Answers (6): Slope and Lines~~

SHORT ANSWER. 22. The slope of a horizontal line is 0 because horizontal lines have no RISE. Slope is rise over run and the slope of a horizontal line will therefore always be 0 divided by some number. 0 divided by any number is always 0. 23. The slope of a vertical line is undefined. This is because vertical lines have no RUN. Slope is rise over run and

Since the slope of a horizontal line is 0, the general formula for the standard form equation , $y = mx + b$ becomes $y = 0x + b$ $y = b$. Also, since the line is horizontal, every point on that line has the exact same y value. This y-value is therefore also the y-intercept.
