*After Molly was forced to reveal the deep, dark secrets surrounding her children's parentage, there was something lacking in their closeness; something preventing them from reigniting the old fires. Although she loved Lake of the Woods, without her children, it wasn't the same! But Kelly helped her find the magic again! Kelly's 'boy dog' soon became the catalyst that triggered her nightmares. Filled with anxiety, Kelly tried to explain her frightening dreams. Something was very wrong! But, with luck, there was still time to change the plot! Then there was Adam, who appeared strong and stable on the outside, but his insides had been messed up five years ago. Finding the letter that his mother hid from him turned Adam's world upside down! It proved that his sisters were only half-sisters, and he had more siblings in Alberta - children sired by his father, and another woman. For the past five years Adam lived with this knowledge, biding his time until he finished school so he could go forth as a man, and fulfill his need to meet his 'other family'. Now that he was eighteen, there was nothing to stop him from finding the truth! He couldn't wait to reveal his identity and to make a decision about which family he would choose! Following in his mother's footsteps, Adam chose to fabricate lies to keep his mom from interfering with his decision, and he headed west, alone! But what he found there was enough to set his world spinning! Nothing was as easy as it looked!*

*Of all mental health disorders, schizophrenia remains the most pervasive, bewildering, and resistant to treatment. In addition to its profound effect on the patient, the illness can be equally devastating to the family, a problem that is compounded by the family's frequent role as provider of primary care. Psychoeducation systematically takes into account the family's role in providing care, and the importance of supporting this system, which in turn supports the patient. It is a method of care that remains focused on the family while making use of biological, psychological, and vocational interventions.*

*SCHIZOPHRENIA IN THE FAMILY represents the first treatment manual based on the psychoeducational model. In conjunction with maintenance chemotherapy, psychoeducation reduces the emotional intensity of the patient's environment and creates a sense of continuous care. Using illustrative case examples, this "how-to-do-it" manual demonstrates methods to: \* Increase treatment compliance \* Sustain patients in the community \* Gradually integrate patients into familial, social, and vocational roles. Specifically, they explain how to develop a productive treatment alliance with the patient and the family, and how to share with them concrete knowledge about the illness as well as management techniques for handling its difficulties. They provide recommendations for managing the critical, early outpatient phase of treatment and suggest methods for promoting the ability to work and socialize outside the home. Additionally, they describe how to conduct the final stages of treatment, when patients may be moving into maintenance sessions, other treatment methods, or toward termination. The book concludes with a helpful chapter on training issues and the application of the psychoeducational model to other mental health systems.*

**Examining situational complexity is a vital part of social and behavioral science research. This engaging text provides an effective process for studying multiple cases--such as sets of teachers, staff development sessions, or clinics operating in different locations--within one complex program. The process also can be used to investigate broadly occurring phenomena without programmatic links, such as leadership or sibling rivalry. Readers learn to design, analyze, and report studies that balance common issues across the group of cases with the unique features and context of each case. Three actual case reports from a transnational early childhood program illustrate the author's approach, and helpful reproducible worksheets facilitate multicase recording and analysis.**
