~~Subjective Global Assessment in Renal Nutrition SOAP NOTES Subjective Global Assessment Form~~

Subjective global assessment (SGA) is the gold standard for diagnosing malnutrition. SGA is a simple bedside method used to diagnose malnutrition and identify those who would benefit from nutrition care. The assessment includes taking a history of recent intake, weight change, gastrointestinal symptoms and a clinical evaluation.

equivalents/day) Physical exam includes a subjective evaluation of 3 aspects of body composition: fat, muscle, & fluid status. Since this is subjective, each aspect of the exam is rated for degree of deficit.

~~Scored Patient-Generated Subjective Global Assessment (PG-SGA)~~

Subjective global assessment has been applied successfully as a method of assessing nutritional status in a variety of patient populations, including: oncology patients, gastrointestinal surgical patients, dialysis patients, AIDS patients, patients with human immunodeficiency virus, lung transplant recipients, liver transplant candidates, geriatric patients, and post-Whipple procedure patients.

~~Patient-Generated Subjective Global Assessment | Cancer ...~~

This study was aimed to compare the subjective and objective nutritional assessments and to analyse the performance of subjective global assessment (SGA) of nutritional status in diagnosing undernutrition in paediatric patients. One hundred and forty children (aged 2-12 years) hospitalized consecutively in Tabriz Paediatric Hospital from June 2008 to August 2008 underwent subjective ...

Background: The Patient-Generated Subjective Global Assessment (PG-SGA) is a patient-reported instrument for assessment of nutrition status in patients with cancer. Despite thorough validation of PG-SGA, little has been reported about the way patients perceive, interpret, and respond to PG-SGA. The aim of this study was to investigate how patients interpret the patient-generated part of the PG ...

~~Patient interpretation of the Patient-Generated Subjective ...~~

Subjective Global Assessment (SGA) is a method for evaluating nutritional status based on a practitioner's clinical judgment rather than objective, quantitative measurements.

~~How to Perform Subjective Global Nutritional Assessment in ...~~

To complement the usual methods of nutritional evaluation, the subjective global assessment (SGA) was proposed by Baker et al. in 1982 as a manual skill for nutritional assessment and as a screening tool to detect patients at risk of developing undernutrition (Wakahara et al. 2007).

~~Subjective global assessment of nutritional status in ...~~

The aim of this study was to evaluate and validate the patient-generated subjective global assessment (PG-SGA) as a screening tool for cancer cachexia. Methods This is a secondary analysis of a multicentre, cross-sectional, observational study. Cancer cachexia was diagnosed when there was weight loss $\geq 5\%$ during the past 12 months and at least three of the five following conditions were ...
