## SAFETY DATA SHEET - Fisher Scientific

Sulfuric acid exposed to air is rapidly taken up by water and produces white fumes. RISK: Sulfuric acid is very irritating and corrosive to the skin, eyes, respiratory track and gastrointestinal track. Ingestion of sulfuric acid can burn the mouth and throat, and erode the stomach; death can occur. Direct eye contact can result in blindness.

## SAFETY DATA SHEET

Sulfuric acid or sulphuric acid, also known as oil of vitriol, is a mineral acid composed of the elements sulfur, oxygen and hydrogen, with molecular formula  $H_2SO_4$ . It is a colourless, odourless, and viscous liquid that is soluble in water and is synthesized in reactions that are highly exothermic. The acid's corrosiveness towards other materials can be mainly described due to its strong acidic nature, and if at a high concentration
