The Sustainable Development Strategy indicated that there should be a presumption against urban-generated one-off housing in rural areas adjacent to towns. It became clear by the time the National Spatial Strategy (NSS) was being prepared that these provisions were sometimes operated over-rigidly.

[Sustainable Rural Housing](#)

The future of urbanization will therefore depend on how countries and cities position housing as a priority in the public debate around sustainable development. From slums to gated communities, from overcrowding to sprawl, from homelessness to the vacant houses, there is much evidence that housing is shaping cities worldwide, regretfully, in many cases, by producing fragmentation and inequalities.

Sustainable urban planning is essential for keeping the earth livable over the long term. This includes various disciplines such as architecture, engineering, biology, environmental science, materials science, law, transportation, technology, economic development, accounting and finance, agriculture, and government.

[Urban Planning For Sustainable Development](#)

New sustainable urban developments or re-developments should provide a variety of commercial, institutional, educational uses as well as housing styles, sizes and prices. The provision of sidewalks, trails, and private streets, connected to transit stops and an interconnected street network within these mixed-use developments provides mobility options and helps reduce pollution by reducing vehicle trips.

About this Research Topic. Urban-rural co-development plays an increasingly important role in a community's sustainable urbanization. It has become a critical pathway to achieve the United Nation's Sustainable Development Goals (SDGs) where establishing urban-rural linkages is an explicit target of SDG 11. A territorial approach to urban-rural development brings about benefits in all three areas of sustainable development: reducing regional equity, enhancing economic synergies, and ...
