

The Language Of Meetings

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Business Across Borders is a unique new series of bilingual books which combines the benefits of business, behavior and language in one volume. The English-French bilingual text is set face-to-face for easy reading and reference. "More than a language guide, useful as a text book, and quite readable In today's international world, business people are increasingly called upon to conduct meetings in a foreign language and culture. The fight communication skills are essential -- not only to speak fluently and understand correctly, but also to avoid the misunderstandings which can result from differences in culture and business philosophy. Meetings will enable you to: -- communicate the right words and phrases -- what a French or English person would actually say, not just a translation. -- lead meetings with confidence an skill -- present your case dearly and authoritatively. -- get to grips with the language, culture and business philosophy of your French-speaking counterpart or colleagues.

David Crystal's classic English as a Global Language considers the history, present status and future of the English language, focusing on its role as the leading international language. English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but engaging way, always backing up observations with facts and figures. Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language.

Casey McDaniel had never been so nervous in his life. In just ten minutes, The Meeting, as it would forever be known, would begin. Casey had every reason to believe that his performance over the next two hours would determine the fate of his career, his financial future, and the company he had built from scratch. "How could my life have unraveled so quickly?" he wondered. In his latest page-turning work of business fiction, best-selling author Patrick Lencioni provides readers with another powerful and thought-provoking book, this one centered around a cure for the most painful yet underestimated problem of modern business: bad meetings. And what he suggests is both simple and revolutionary. Casey McDaniel, the founder and CEO of Yip Software, is in the midst of a problem he created, but one he doesn't know how to solve. And he doesn't know where or who to turn to for advice. His staff can't help him; they're as dumbfounded as he is by their tortuous meetings. Then an unlikely advisor, Will Peterson, enters Casey's world. When he proposes an unconventional, even radical, approach to solving the meeting problem, Casey is just desperate enough to listen. As in his other books, Lencioni provides a framework for his groundbreaking model, and makes it applicable to the real world. Death by Meeting is nothing short of a blueprint for leaders who want to eliminate waste and frustration among their teams, and create environments of engagement and passion.

A Chance Meeting

Parenting Matters

Each chapter in this remarkable consideration of American culture evokes an actual meeting between two historical figures. In 1854, as a boy, Henry James has his daguerreotype made by Mathew Brady. We encounter Brady again as he photographs Walt Whitman and then Ulysses Grant. Meanwhile, Henry James begins a lasting friendship with William Dean Howells, and also meets Sarah Orne Jewett, who in turn is a mentor to Willa Cather... Cohen brilliantly reanimates these unforgettable pairings and those of Edward Steichen and Alfred Stieglitz; Carl Van Vechten and Gertrude Stein; Hart Crane and Charlie Chaplin; Langston Hughes and Zora Neale Hurston; Elizabeth Bishop and Marianne Moore; Richard Avedon and James Baldwin; and John Cage and Marcel Duchamp; Norman Mailer and Robert Lowell. Ultimately, Cohen reveals and long chain of friendship, rebellion and influence stretching from the moment before the Civil War through a century that had a profound effect on our own time. A Chance Meeting is an intimate and original act of biography and cultural history that makes its own contribution to the tradition about which Cohen writes.

This collection of papers, comments, and documents traces the distant and recent history of the Ebonics debate in the USA. The book examines how, despite increasing access to public education over the past century, schools continue to impose language standards and expectations on children that methodically privileges some, while disadvantaging others.

Russian is spoken by nearly 450 million people, and demand for Russian-speakers is growing. This introductory course includes an audio CD with practice dialogues—just the ticket for readers who need basic Russian for business, school, or travel. Serafima Gettys, PhD (Newark, CA), is Coordinator of the Foreign Language Program at Lewis University. Andrew Kaufman, PhD (Charlottesville, VA), is a Visiting Assistant Professor at the University of Virginia. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

NEW YORK TIMES BESTSELLER “ It ’ s undeniably thrilling to find words for our strangest feelings...Koenig casts light into lonely corners of human

experience...An enchanting book. “ —The Washington Post A truly original book in every sense of the word, *The Dictionary of Obscure Sorrows* poetically defines emotions that we all feel but don't have the words to express—until now. Have you ever wondered about the lives of each person you pass on the street, realizing that everyone is the main character in their own story, each living a life as vivid and complex as your own? That feeling has a name: “sonder.” Or maybe you've watched a thunderstorm roll in and felt a primal hunger for disaster, hoping it would shake up your life. That's called “lachesism.” Or you were looking through old photos and felt a pang of nostalgia for a time you've never actually experienced. That's “anemoia.” If you've never heard of these terms before, that's because they didn't exist until John Koenig set out to fill the gaps in our language of emotion. *The Dictionary of Obscure Sorrows* “creates beautiful new words that we need but do not yet have,” says John Green, bestselling author of *The Fault in Our Stars*. By turns poignant, relatable, and mind-bending, the definitions include whimsical etymologies drawn from languages around the world, interspersed with otherworldly collages and lyrical essays that explore forgotten corners of the human condition—from “astrophe,” the longing to explore beyond the planet Earth, to “zenosyne,” the sense that time keeps getting faster. *The Dictionary of Obscure Sorrows* is for anyone who enjoys a shift in perspective, pondering the ineffable feelings that make up our lives. With a gorgeous package and beautiful illustrations throughout, this is the perfect gift for creatives, word nerds, and human beings everywhere.

My Language, Our Language

Meeting Special Needs: A practical guide to support children with Speech, Language and Communication Needs (SLCN)

Originally published in 1989. Drawing on extensive teaching and research experience, Bernadette Walsh provides a practical approach to teaching pupils with language learning difficulties in the secondary school. Many of these pupils enter secondary school believing themselves to be failures in all areas because of their inability to express themselves in words. Walsh emphasises that learning difficulties of this sort often stem from emotional problems and can only be overcome by establishing warm teacher-pupil relationships based on trust and mutual acceptance and fostered by the spoken language. The book is based around the teacher's diary which Bernadette Walsh kept as a daily record of her work in the classroom. This vivid and immediate account lends weight to her argument that only an arts-based curriculum involving poetry, story, drama, dance, art, and – above all – talk, can help the development of children with special educational needs. Student teachers will find this text a compelling and realistic introduction to a challenging area of their future profession.

This innovative volume presents an in-depth study of the language used by participants in business meetings. The cutting-edge research draws on the Cambridge and Nottingham Business English Corpus (CANBEC), a unique resource which brings together meetings of different types both within and between companies, involving speakers whose roles and responsibilities vary, and who represent a range of nationalities and first languages. Keywords, concordance lines and discourse analysis provide thorough insights into aspects such as the structural stages of meetings, participants' discursive practices, interpersonal language and creativity, and power and constraint. The author concludes by making practical suggestions for using these findings to inform the teaching of business English.

In this "important and alarming" book, see why so many American students are falling behind in their reading skills while others around the world excel (New York Times). The way we teach reading is not working, and it cannot continue. We have largely abandoned phones-based reading instruction, despite research that supports its importance for word recognition. Rather than treating Black English as a valid dialect and recognizing that speaking one dialect can impact the ability to learn to read in another, teachers simply dismiss it as "incorrect English." And while we press children to develop large vocabularies because we think being a good reader means knowing more words, studies have found that a large vocabulary is only an indication of better pattern recognition. Understanding the science of reading is more important than ever--for us, and for our children. Seidenberg helps us do so by drawing on cutting-edge research in machine learning, linguistics, and early childhood development. *Language at the Speed of Sight* offers an erudite and scathing examination of this most human of activities, and concrete proposals for how our society can produce better readers.

It is well known that the number of non-English speakers is on the rise in the United States. What is less well known is that the largest proportion of this population is children under the age of 5. These young English language learners (ELLs) often demonstrate achievement gaps in basic math and reading skills when they start school. How best to educate this important and growing preschool population is a pressing concern for policymakers and practitioners. The chapters in this important book provide up-to-date syntheses of the research base for young ELLs on critical topics such as demographics, development of bilingualism, cognitive and neurological benefits of bilingualism, and family relationships, as well as classroom, assessment, and teacher-preparation practices. Contributors: Linda M. Espinosa, Margaret Freedson, Claudia Galindo, Fred Genesee, Donald J. Hernandez, José E. Náñez Sr., and Flora V. Rodríguez-Brown “This is a must-have for those who are working directly or indirectly with young English language learners.”

Non-threatening Leadership Strategies for Women

The King in Yellow

We spend our lives gathering - first in classrooms and then in meetings, weddings, conferences and away days. Yet so

many of us spend this time in underwhelming moments that fail to engage us, inspire us, or connect us. We've all sat in meetings where people talk past each other or go through the motions and others which galvanize a team and remind everyone why they first took the job. We've been to weddings that were deeply moving and others that were run-of-the-mill and simply faded away. Why do some moments take off and others fizzle? What's the difference between the gatherings that inspire you and the ones that don't? In *The Art of Gathering*, Priya Parker gets to the heart of these questions and reveals how to design a transformative gathering. An expert on organizing successful gatherings whether in conference centres or her living room, Parker shows us how to create moving, magical, mind-changing experiences - even in spaces where we've come to expect little.

Toward the end of the year 1920 the Government of the United States had practically completed the programme, adopted during the last months of President Winthrop's administration. The country was apparently tranquil. Everybody knows how the Tariff and Labour questions were settled. The war with Germany, incident on that country's seizure of the Samoan Islands, had left no visible scars upon the republic, and the temporary occupation of Norfolk by the invading army had been forgotten in the joy over repeated naval victories, and the subsequent ridiculous plight of General Von Gartenlaube's forces in the State of New Jersey. The Cuban and Hawaiian investments had paid one hundred per cent and the territory of Samoa was well worth its cost as a coaling station. The country was in a superb state of defence. Every coast city had been well supplied with land fortifications; the army under the parental eye of the General Staff, organized according to the Prussian system, had been increased to 300,000 men, with a territorial reserve of a million; and six magnificent squadrons of cruisers and battle-ships patrolled the six stations of the navigable seas, leaving a steam reserve amply fitted to control home waters. The gentlemen from the West had at last been constrained to acknowledge that a college for the training of diplomats was as necessary as law schools are for the training of barristers; consequently we were no longer represented abroad by incompetent patriots. The nation was prosperous; Chicago, for a moment paralyzed after a second great fire, had risen from its ruins, white and imperial, and more beautiful than the white city which had been built for its plaything in 1893. Everywhere good architecture was replacing bad, and even in New York, a sudden craving for decency had swept away a great portion of the existing horrors. Streets had been widened, properly paved and lighted, trees had been planted, squares laid out, elevated structures demolished and underground roads built to replace them. The new government buildings and barracks were fine bits of architecture, and the long system of stone quays which completely surrounded the island had been turned into parks which proved a god-send to the population. The subsidizing of the state theatre and state opera brought its own reward. The United States National Academy of Design was much like European institutions of the same kind. Nobody envied the Secretary of Fine Arts, either his cabinet position or his portfolio. The Secretary of Forestry and Game Preservation had a much easier time, thanks to the new system of National Mounted Police. We had profited well by the latest treaties with France and England; the exclusion of foreign-born Jews as a measure of self-preservation, the settlement of the new independent negro state of Suanee, the checking of immigration, the new laws concerning naturalization, and the gradual centralization of power in the executive all contributed to national calm and prosperity. When the Government solved the Indian problem and squadrons of Indian cavalry scouts in native costume were substituted for the pitiable organizations tacked on to the tail of skeletonized regiments by a former Secretary of War, the nation drew a long sigh of relief. When, after the colossal Congress of Religions, bigotry and intolerance were laid in their graves and kindness and charity began to draw warring sects together, many thought the millennium had arrived, at least in the new world which after all is a world by itself.

The purpose of the book is to highlight the critical and intercultural potential of foreign languages and foreign language education. The book addresses the complexity of the experience of (foreign) languages and offers both theoretical interdisciplinary suggestions and applied examples of activities.

James and the Giant Peach by Roald Dahl in magnificent full colour. James Henry Trotter lives with two ghastly hags. Aunt Sponge is enormously fat with a face that looks boiled and Aunt Spiker is bony and screeching. He's very lonely until one day something peculiar happens. At the end of the garden a peach starts to grow and GROW AND GROW. Inside that peach are seven very unusual insects - all waiting to take James on a magical adventure. But where will they go in their GIANT PEACH and what will happen to the horrible aunts if they stand in their way? There's only one way to find out . . . Look out for new Roald Dahl apps in the App store and Google Play- including the disgusting TWIT OR MISS! inspired by the revolting Twits. "A true genius . . . Roald Dahl is my hero" David Walliams

Managing Language

The book attempts to answer the question: what do managers in multinational companies really do during meetings? Following fieldwork in three corporations in Britain and Italy, the picture that emerges is one that challenges the widespread understanding of meetings as boring, routine events in the life of an organisation. As the recordings analysed in the book show, organisational meanings and relations come into existence through verbal interaction; these are challenged and manipulated in a constant process of sense-making in search of coherence which engages managers in their daily work life. The pragmatics of pronominalisation, metaphors and

discourse markers, as well as thematic development, reveal the dynamics of sense-making in both English and Italian. The 'native' perspective adopted in Part One of the book is complemented, in Part Two, by a contrastive study of the structural and pragmatic properties of meetings in the corporate and cultural contexts of the British and Italian multinationals, respectively. Finally, the intercultural dimension of corporate communication is vividly portrayed in the experience of managers of an Anglo-Italian joint venture examined in the concluding chapter. Discusses popular myths about educating students in a multilingual society, examining such themes as the demographics of second language learners, the theory underlying language instruction, and language and the law.

Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in *Arrow of God* and *No Longer at Ease*.

Now adopted by over 40 states, the Common Core State Standards provide a clear and consistent framework for public school systems as they develop student learning goals that define the path to readiness for college, careers, and informed citizenship. While each state is developing its own procedures for adoption of the Standards, individual teachers will continue to hold the ultimate responsibility for devising lesson plans and tailoring instruction to meet these benchmarks. *Making Language Matter* will help prospective and practicing teachers develop lessons to meet the benchmarks enumerated in the Standards for the English Language Arts categories: language, speaking and listening, writing, and reading. A timely text for literacy education courses, it explores language topics within these categories and suggests pedagogical approaches and activities for use in 9-12 language arts classrooms. Using a linguistics approach to unify the study of all the language arts, it engages readers in learning how to help students make purposeful language choices essential for both academic and workplace success.

Prediction of Design Team Performance Through Analysis of Language Use in Meetings

This volume presents seven extensive essays by specialists in their respective fields of historical linguistics. The first essay after the Introduction states the principles presented in *Directions for Historical Linguistics* (1968) and assesses the progress made since then towards constructing a general theory of language change. Like the following essays on phonology and morphology, it poses new questions that have arisen in the increasingly ambitious research. Historical attention to discourse, the topic of the next essay, is virtually new, though it too finds predecessors among philologists who devoted themselves to texts. Finally, two essays treat etymology, one concentrating on the rigorously investigated Romance field, the other on Indo-European, especially on new insights prompted by attention to Hittite.

A growing number of children appear to be experiencing delays or difficulties in their speech, language and communication skills. In this book, the author outlines how to identify these children and how to support them effectively. This practical guide to the field of speech, language and communication needs (SLCN) is a timely and practical guide for early years' professionals, as well as the non-specialist practitioner, and parents or carers.

The Language of Business Meetings Cambridge University Press

"Of the over one hundred new publications on the Common Core State Standards (CCSS), this one truly stands out! In the second edition of *Building Academic Language*, Jeff Zwiers presents a much-needed, comprehensive roadmap to cultivating academic language development across all disciplines, this time placing the rigor and challenges of the CCSS front and center. A must-have resource!" —Andrea Honigsfeld, EdD, Molloy College "Language is critical to the development of content learning as students delve more deeply into specific disciplines. When students possess strong academic language, they are better able to critically analyze and synthesize complex ideas and abstract concepts. In this second edition of *Building Academic Language*, Jeff Zwiers successfully builds the connections between the Common Core State Standards and academic language. This is the 'go to' resource for content teachers as they transition to the expectations for college and career readiness." —Katherine S. McKnight, PhD, National Louis University With the adoption of the Common Core State Standards (CCSS) by most of the United States, students need help developing their understanding and use of language within the academic context. This is crucially important throughout middle school and high school, as the subjects discussed and concepts taught require a firm grasp of language in order to understand the greater complexity of the subject matter. *Building Academic Language* shows teachers what they can do to help their students grasp language principles and develop the language skills they'll need to reach their highest levels of academic achievement. The Second Edition of *Building Academic Language* includes new strategies for addressing specific Common Core standards and also provides answers to the most important questions across various content areas, including: What is academic language and how does it differ by content area? How can language-building activities support content understanding for students? How can teachers assist students in using language more effectively, especially in the academic context? How can academic language usage be modeled routinely in the classroom? How can lesson planning and assessment support academic language development? An essential resource for teaching all

students, this book explains what every teacher needs to know about language for supporting reading, writing, and academic learning.

The Urban Education Debate

The Meeting Planning Process

In the research to be reported here, there has been developed a new, performance-predictive method of examining how team members interact in design meetings. It is based on an already--developed measure of how we adjust and coordinate our use of language when interacting, called the Language Style Matching (LSM) measure (Gonzales et al., 2010). The LSM measure has already been shown to give insight into peoples' psychology and ways of interacting. The insight available from the LSM measure is due to a well-established aspect of human behavior: when we interact, we adjust our behavior in response to each other in myriad ways. This is fundamental to who we are as social beings. We use these ways, both consciously and unconsciously, to develop ideas together, to plan together, to play and work together — for all our coordination in groups. We also adjust our language use toward one another. This adjustment — described with such terms as "language matching" and "entrainment" — has been shown in a number of studies to be predictive of the outcome of task-oriented conversations. The LSM measure is one proven way to measure this adjustment. Design-oriented meetings and conversations, though, have not been analyzed in these terms. For this research, two corpora of face-to-face design meeting transcripts are analyzed: one set is of a group of researchers meeting over time to develop computer systems to analyze language; the other set is of 13 different teams working on the conceptual re-design of a handheld sensor device. The results of the latter teams' work were rated by a group of expert designers, as a way of assessing the relative performance of the teams. Through the application of some simple statistical methods, this research has uncovered some new patterns in the language used in the design meeting corpora. They are based on measures of language use derived from and stronger than those from the original LSM measure. Several of the new patterns are shown to be predictive of the quality of the design teams' work in the performance-rated second corpus. Evidence is also given that the new measures correlate with several aspects of the meetings that differ between the two corpora, such as pace of the meetings and level of acquaintance of the participants. Many of the ways that design teams have been studied in the past require a great deal of intensive effort by well-trained researchers. Their high cost limits the quantity and variety of teams, settings, projects, etc. that can be studied and compared. In turn, this limits our efforts to understand and improve teams' dynamics. Like the LSM measure it is based on, the new method of analysis needs only transcripts of conversations for analysis, is topic-independent, and is comparatively inexpensive to use. As a result, it can be the basis for examining and comparing interpersonal dynamics and performance in design teams as they work in a large variety of situations, towards different goals. In this dissertation strengths and limitations of this new method are also discussed. Used as a complement to more detail-oriented analyses, the method promises a breadth of view on design work that hasn't been available before.

*The unspoken rules for how women should behave in the workplace are as numerous as they are confusing. Let viral tik-tok and Netflix star Sarah Cooper be your guide! Ask for a pay rise? Pushy. Take credit for an idea? Arrogant. Admit a mistake? Weak. Successfully juggle work and family? Unpromotable. In *How to Be Successful Without Hurting Men's Feelings*, Sarah Cooper, author of the bestselling *100 Tricks to Appear Smart in Meetings*, illustrates how women can achieve their dreams, succeed in their careers and become leaders, without harming the fragile male ego. This wickedly funny tongue-in-cheek guide includes chapters on 'How to Ace Your Job Interview Without Over-acing It', '9 Non-threatening Leadership Strategies for Women', and 'Choose Your Own Adventure: Do You Want to Be Likeable or Successful?'. It even includes several pages to doodle on while men finish explaining things. When all else fails, there is a set of cut-outable moustaches inside to allow women to seem more man-like, which will probably lead to a quick promotion!*

This guide is packed full of straightforward ideas to help teachers get a grip on good classroom practice and will help teachers understand language development and its impact upon pupils attainment.

Drawing on the latest research into how young children learn, this book considers how early years practitioners can best meet the needs of children with English as an Additional Language. It examines the factors that influence children's learning including parents and the family, the environment, health and well-being, curriculum, play and relationships and aims to challenge misconceptions, assumptions and stereotypes. Featuring case studies and reflective questions, the chapters explore a range of important topics including: Language learning for children with EAL The historical concept and modern reconceptualisation of EAL How to develop and use Culturally Appropriate Pedagogy Regulation and performativity and their implications for children with EAL Leading learning for children with EAL Meeting the Needs of Young Children with English as an Additional Language is essential reading for students and practitioners wanting to promote an inclusive culture where different languages, cultures and religions are accepted and celebrated.

We all have questions regarding God's paradise in heaven; as Christians, there is nothing more disappointing as spending all your life on earth convinced that you will go to

Paradise when you die only to arrive there and hear Jesus say to you, "You are not saved; you are going to hell." There are more than 6,000 spoken languages in the world but one thing that sets heaven apart from the earth is the fact that there is only one language in Heaven. A good knowledge of the Language of Heaven will prepare you to better understand the Holy Bible, the teachings of Jesus Christ, his parables, and the miracles he performed. This book will introduce you to the Language of Heaven, answer your questions about heaven, prepare you for the struggles of this world, and ultimately help to prepare you for Jesus Christ. When you read this book, you will know without any doubts if indeed you are truly saved and ready to enter God's paradise in Heaven. This book is Volume One of "Face to Face Meetings with Jesus Christ" trilogy and a must-read for every soul. Felix Wantang has been meeting face-to-face with Jesus Christ since October 1991. Contact him at: ftfmeetingswithjesuschrist@gmail.com.

After 40 years of Cold War, NATO found itself intervening in Bosnia-Herzegovina, Kosovo and Afghanistan, where the ability to communicate with local people was essential to the success of the missions. This book explains how the Alliance responded to this challenge so as to ensure that the missions did not fail through lack of understanding.

In the schools of today, English learners are the fastest-growing segment of the student population. As such, it is increasingly imperative to educate these students properly, while still practicing inclusion for overall student success. The Handbook of Research on Pedagogies and Cultural Considerations for Young English Language Learners is an authoritative research publication on research-based, theoretical frameworks and best practices for teaching young English language learners. Featuring exhaustive coverage on a variety of topics and perspectives such as co-teaching, inclusion, and social awareness, this publication is ideally designed for academicians, researchers, and students seeking current research on the examination of how diverse backgrounds, cultures, and experiences contribute to curriculum and pedagogy for bilingual young learners.

Boost students' language arts skills and meet standards—without adding to your schedule!

Do you start the day with Morning Meeting? If so, you can use some of that time to reinforce students' language arts learning. These fun, lively activities enable you to seamlessly integrate language arts into a daily Morning Meeting. You'll find language arts activities for each component of Morning Meeting—greeting, sharing, group activity, and morning message. From reading poetry with sound effects to pantomiming idioms to guessing which character someone's describing, these activities are varied, challenging, and confidence-building. Features that make them easy to use: Clear, step-by-step directions Can be used with any curriculum Few or no materials required Variations and extensions for language arts lessons Activities sorted by grade, but can be adapted for any grade This book helps you inspire students' interest in language arts and give them practice in key skills—all while enriching and enlivening your Morning Meetings.

"The Meeting Planning Process -- A Guide to Planning Successful Meetings" by Certified Meeting Professional Mary Jo Wiseman offers a common sense approach to managing the meeting planning process based on the knowledge and experience she garnered over her career as a corporate meeting and event coordinator. The author's systematic approach to project management helped her to stay focused on the task at hand while handling multiple details, projects and deadlines throughout her career and she wants to share her expertise for success with others. The author firmly believes it is NOT just one person who makes a meeting or event happen, but rather a TEAM of dedicated, enthusiastic, talented individuals who come together to do what they do best to help organizations EXCEED their PROGRAM OBJECTIVES and make them SHINE. It is the PROCESS or system used to get started that can either keep you on track or send you off the rails. This Guide offers a practical overview of the entire planning process for people just starting out in the meeting planning world, meeting planning veterans alike, and offers keen insights and valuable tips to help CREATE the perfect EXPERIENCE for their audience by staying true to the basic elements of the planning process. It is intended to lead people through the proper steps and the tasks involved in planning a meeting such as: Establishing a Planning or Design Team; Developing an Overall Plan; Budgeting; Site Selection; Communications; Contract Review and more. The Guide also includes handy templates developed by the author -- a Meeting Invitation, Overall Plan; and Request for Proposal as well as descriptions and diagrams of possible room set-ups.
