The USGA Course Rating system looks at each landing zone for both scratch and bogey golfers. There's a designated shot length for men and women. Nearly a dozen different calculations are made on every single hole.

USGA Course Rating: How does it work and why does it ...

The USGA Course Rating System takes into account the factors that affect the playing difficulty of a course. The USGA Course Rating System is designed to ensure that the rating of a course is in proper relation to the ratings of other courses. If this is not achieved, players at courses rated

too low will be over- handicapped, and vice versa.

The USGA Course Rating System - SCGA

Slope Rating® An indication of the relative difficulty of a golf course for players who are not scratch players compared to players who are scratch players. The lowest Slope Rating is 55 and the highest is 155. Example: 125 Questions or comments: crdbquestions@usga.org

National Course Rating Database

USGA Course Rating is a numerical value given to each set of tee boxes at a golf course to approximate the number of strokes it should take a scratch golfer to complete the course. Course rating is a very important part of the USGA Handicap System and is used in calculating a golfer's handicap index.

Want to know your Golf Course's Slope Rating?

The USGA has a system for calculating course slope and rating, so this pretty much comes down to math. For course rating, 90 percent of the number is determined by distance.

What is Augusta National's official course slope and ...

The USGA Course Rating System takes into account the factors that affect the playing difficulty of a course. The USGA Course Rating System is designed to ensure that the rating of a course is in proper relation to the ratings of other courses. If this is not achieved, players at courses rated too low will be over-handicapped, and vice versa.

The USGA CoURSe RATInG SySTem - Greenock Golf Club

The minimum slope rating is 55 and the maximum is 155 (slope does not relate specifically to strokes played as course rating does). When the slope rating system was first put

into effect, the USGA set the slope for an "average" golf course at 113; however, not many 18-hole golf courses have slope ratings that low. Some do, but the real-world average is higher than 113. (However, a slope of 113 is still used in certain calculations within the handicap system.)

Explanation of Slope Rating in Golf

USGA Course Rating is an evaluation of the difficulty of a golf course for scratch golfers. (More specifically, the number is an estimate of the average scores of the best 50-percent of rounds played by scratch golfers at the course being rated.) Course rating is very easy to understand because it is expressed in strokes.

What do golf course rating and golf course slope mean ...

A Course Rating represents the expected score for a scratch player (Handicap Index of 0.0) under normal playing conditions, while a Bogey Rating represents the expected score for a bogey player (Handicap Index 20.0 to 24.0).

USGA Course Rating Process. Course Rating is an evaluation of the playing difficulty of a golf course for scratch golfers under normal course and weather conditions. (This means that generally rating can only be undertaken from April until the end of September.) It is based on the effective playing length and other obstacles to the extent that they affect the scoring difficulty of the scratch golfer.
