Impression management theory has been popular in sociology and social psychology for many years. This volume offers the first comprehensive application of impression management theory to organizational settings. Researchers and practitioners in organizational settings have recently been using this theory as an explanatory model to focus on the roles and identities that "social actors" utilize in interpersonal situations. The theory of impression management provides a framework for the techniques and strategies people use in order to look good as well as the excuses and justifications they employ to avoid looking bad.

Combines a dictionary of key legal terms with an index of leading United States Supreme Court cases indexed by type of case, such as death penalty, right to counsel, and searches and seizures.

Cyber Crime and Digital Evidence: Materials and Cases

Colorado Lawyer

**This Green Paper sets out plans for fundamental changes to the criminal justice system and addresses the three priorities of punishing offenders, protecting the public and reducing reoffending. It seeks to set out an intelligent sentencing framework, coupled with more effective rehabilitation. Despite a 50% increase in the budget for prisons and managing offenders in the last ten years, almost half of all adult offenders released from custody reoffend within a year as well as 75% of youth custody offenders. These proposed reforms will seek to make prisons places of hard work and industry. There will be a greater use of strenuous, unpaid work as part of a community sentence alongside tagging and curfews. There will also be a greater focus on the enforcement and collection of fines, and a much stronger emphasis on compensation for victims of crime. Six new rehabilitation programmes will be piloted on a payment by results basis. Treatment rather than prison will be the option for the less serious offenders with mental illness and drug dependency. The proposals also seek to introduce more straightforward sentencing alongside greater transparency from the courts. The publication is divided into seven chapters, covering the following areas: punishment and payback; rehabilitating offenders to reduce crime; payment by results; sentencing reform; youth justice and working with communities to reduce crime, along with two annexes.**

*Forensic Accounting and Fraud Examination introduces students and professionals to the world of fraud detection and deterrence, providing a solid foundation in core concepts and methods for both public and private sector environments. Aligned with the National Institute of Justice (NIJ) model curriculum, this text provides comprehensive and up-to-date coverage of asset misappropriation, corruption, fraud, and other topics a practicing forensic accountant encounters on a daily basis. A focus on real-world practicality employs current examples and engaging case studies to reinforce comprehension, while in-depth discussions clarify technical concepts in an easily relatable style. End of chapter material and integrated IDEA and Tableau software cases introduces students to the powerful, user-friendly tools accounting professionals use to maximize auditing and analytic capabilities, detect fraud, and comply with documentation requirements, and coverage of current methods and best practices provides immediate relevancy to real-world scenarios. Amidst increased demand for forensic accounting skills, even for entry-level accountants, this text equips students with the knowledge and skills they need to successfully engage in the field.*

Cyber Crime and Digital Evidence Materials and Cases is designed to be an accessible introduction to Cyber

Crime and Digital Evidence. The title illuminates two significant aspects of this book. First, cyber crime is only a subset of a much broader trend in the criminal area, which is the use of digital evidence in virtually all criminal cases. Hence, it is important to understand the legal framework that regulates obtaining that increasingly used and important evidence. Second, this book provides a broader framework than an endless stream of cases offers. Law students deserve the broader context and, hopefully, will get some of it with this book. Here is a summary of the topics covered throughout the twenty chapters in this exciting new book:

- Obtaining Digital Evidence
- Fourth Amendment Applicability: "Inside the Box"
- Competing Views of the Nature of Digital Evidence Searches
- Warrants for Digital Evidence: Particularity Claims and Broad Seizures
- Search Execution Issues
- Consent Searches: Compelling Disclosure of Passwords
- Cell phones, Other Mobile Digital Devices, and Traditional Fourth Amendment Doctrine Permitting Warrantless Searches
- Seizures of Digital Evidence
- Searches at the International Border
- Fourth Amendment Applicability to Networks and the Internet
- Statutory Regulation of Obtaining Data
- Obscenity and Child Pornography
- Policing the Internet for Crimes Involving Exploitation of Children
- Property Crimes and Computer Misuse
- Computer Specific Crimes: Unauthorized Access, Fraud, and Damage
- Intellectual Property Theft
- Spyware, Adware, Malware, Phishing, Spam and Identity-Related Crime
- Other Crimes Against Persons (Cyberbullying, Threats, Stalking)

How to Succeed in Professional Services

**Examine the practical structure and function of today's legal system from the perspective of the professional business practitioner with Meiners/Ringleb/Edwards' popular THE LEGAL ENVIRONMENT OF BUSINESS, 14E. This edition highlights law and regulatory areas of the legal environment that are most relevant and important in business today. This edition's traditional case focus is updated with almost 40% new cases to reflect today's legal changes. Court cases summarize background facts and present case decisions in the words of the courts, but the authors have carefully edited cases to focus only on key issues relevant to understanding the legal reasoning. You examine a range of legal topics with business-specific examples and meaningful cases that direct your attention to key points of law. Seminar paper from the year 2012 in the subject Law - Criminal process, Criminology, Law Enforcement, grade: 1,7, Swansea University (College of Law), course: Gender, Crime and Criminal Justice, language: English, abstract: When it comes to sentencing offenders, the general public is quick to demand the highest possible sentencing available, and tends to focus on retaliation and public security rather than resettlement. Prison sentences are seen as the default solution for all kinds of offenders, and prison is often considered a place which best addresses the needs of both offenders and the general population. Yet, prisons are overcrowded, expensive and proven to produce high reoffending rates – and they are definitely not the best option everyone. Alternative models, such as community sentences, on the other hand, have a reputation of being too 'soft' on criminals, i.e. not meeting the public's expectations in terms of punitiveness, and its effectiveness is often doubted. Rather than interpreting 'soft on crime' in the sense of public perception, I will relate this to its effectiveness in terms of reoffending rates. In the following I would thus like to analyse in how far a decarcerative policy in respect of female offenders might help address the special needs of female offenders better and, thus, help stop them from reoffending. I will first focus on them make-up of the women's prison population, then turn to the situation of women in prison in order to tie this in with reoffending rates, and finally point out some ways to improve the current situation. Key Skills for Professionals will help you understand and develop the skills you need to be truly professional in a fiercely competitive environment. The areas covered in this book are useful not only to those qualifying for a profession but also for those people who are already working in a professional services business. Practising and demonstrating these skills effectively will help you in your day-to-day work, and could enhance your career progression. Based on their knowledge, experience and expertise, the authors first explain the theory and applicability of each skill area and then provide practical and realistic advice as to how to apply those skills in the working environment on a daily basis. Each chapter explains appropriate management tools and theories in plain language using practical exercises, realistic and relevant case studies and tools for analysing self-awareness, communication styles, financial and commercial awareness and effective writing. The book also contains useful summaries and ideas for further reading.

**This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness**

offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

"Female protagonists are commonly overlooked in the history of crime; especially in early modern Italy, where women's scope of action is often portrayed as heavily restricted. This book redresses the notion of Italian women's passivity, arguing that women's crimes were far too common to be viewed as an anomaly. Based on over two thousand criminal complaints and investigation dossiers, Sanne Muurling charts the multifaceted impact of gender on patterns of recorded crime in early modern Bologna. While various socioeconomic and legal mechanisms withdrew women from the criminal justice process, the casebooks also reveal that women - as criminal offenders and savvy litigants - had an active hand in keeping the wheels of the court spinning"--

This book contains commentary on three key sentencing statutes, and on sentencing law for nine offence categories.

This ebook is a selective guide designed to help scholars and students of criminology find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books, chapters, and journal articles to online archives, electronic data sets, and blogs. Written by a leading international authority on the subject, the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated related. A reader will discover, for instance, the most reliable introductions and overviews to the topic, and the most important publications on various areas of scholarly interest within this topic. In criminology, as in other disciplines, researchers at all levels are drowning in potentially useful scholarly information, and this guide has been created as a tool for cutting through that material to find the exact source you need. This ebook is a static version of an article from Oxford Bibliographies Online: Criminology, a dynamic, continuously updated, online resource designed to provide authoritative guidance through scholarship and other materials relevant to the study and practice of criminology. Oxford Bibliographies Online covers most subject disciplines within the social science and humanities, for more information visit [www.aboutobo.com](http://www.aboutobo.com).
