Terrorism and Temporality
in the Works of Thomas

starts from a simple
premise: that the events
of the 11th of September
2001 must have had a major
effect on two New York

seminal authors of
American letters, Pynchon
and DeLillo. By examining

allusion to these events in their work, it becomes apparent that both consider 9/11 a crucial event, and that it has profoundly impacted their work. From this important point, the volume focuses on the major change identifiable in both authors' work; a change in the perception, and conception, of time. This is not, however, a simple change after 2001. It allows, at the same time, a re-examination of both authors work, and the acknowledgment of time as a crucial concept to both

Engaging with several theories of time, and their reiteration and examination in both authors' work, this volume contributes both to the understanding of literary time, and to the work of Pynchon and DeLillo. This volume details Margaret Atwood's dystopian novels through the themes of the ambivalent ethics of science and technology, the position of women in the male-dominated world, and the ambiguous role played by religion and spirituality. The book's unique

and original approach places Atwood's fiction within the contemporary world, with all the problems of our fast-changing reality. Furthermore, it provides an excellent reading of her dystopias in a broader, humanist context, with an emphasis on the social, cultural and political issues that have been important for both her, the writer, and us, the readers.

Heffernan uses modernist and post-modernist novels as evidence of the diminished faith in the existence of an inherently meaningful end.

his survival but that of the entire world. Surviving the Fall is a thrilling post-apocalyptic episodic series that focuses on Rick and Dianne Waters and how they each deal with the apocalypse. Stranded across the country away from his family, Rick must travel from California to Virginia to reunite with his wife and children, all while struggling to comprehend and deal with the horrors along the way. At home with her three children when she experiences the beginning of the end in a dramatic and deadly fashion, Dianne Waters has experience as a prepper and survivalist, but not even years of training and preparation have readied her for the darkness that comes with the end of the world. Now she must draw upon those skills to protect her loved ones and fight back against those who come against her

of the L'Hotel Sixieme in Switzerland after an academic conference, still mulling over how to respond to his wife, he receives a string of horrifying push notifications. Washington, DC has been hit with a nuclear bomb, then New York, then London, and finally Berlin. That's all he knows before news outlets and social media goes black—and before the clouds on the horizon turn orange. Now, two months later, there are twenty survivors holed up at the hotel, a place already tainted by its strange history of suicides and murders. Those who can't bear to stay commit suicide or wander off into the woods. Jon and the others try to maintain some semblance of civilization. But when the water pressure disappears, and Jon and a crew of survivors investigate the hotel's water tanks, they are shocked

NOTE REGARDING PG-13 RATING

The Lone Star Series does not contain strong language. It is intended to entertain and inform audiences of all ages, including teen and young adults. Although some scenes depict the realistic threat our nation faces from an EMP attack and nuclear destruction, and the societal collapse which will result in the aftermath, it does not contain graphic scenes typical of other books in the post-apocalyptic genre. I believe more of our young people need to lead a preparedness lifestyle. Studies show that our millennials do not have any of the basic survival skills. By writing this series free of vulgarities and gratuitous sexual innuendo, I've intended it to be suitable for everyone. Thanks. BOOKS IN THE LONE STAR SERIES AXIS OF EVIL - Available now. BEYOND

The COVID-19 pandemic caused a disruption for many industries at its emergence, including the rental industry.

The rental industry consists of more than just car rentals. It also includes Airbnb, house rentals, cruises, and other means of transport. This industry, which relies on tourism, was negatively affected by the travel restrictions that were put in place due to the pandemic. As such, it had to quickly adapt and grow to abide by the rules of the "new normal" in order to survive both during the pandemic, as well as implement new models and strategies that would help it to regain its success post-COVID-19. American author, Don DeLillo

has examined the manner in

which contemporary American

consciousness has been shaped

by the historically unique

incursion into daily life of

information, military, and

consumer technologies. In

DeLillo's fictions, technological

apparatuses are not merely set-

pieces in the characters'

environments, nor merely tools

to move the plot along, they are

sites of mystery and magic,

whirlpools of space-time, and

convex mirrors of identity.

Television sets, filmic images, automobiles, airplanes, telephones, computers, and nuclear bombs are not simply objects in the world for DeLillo's characters; they are psychological phenomena that shape the possibilities for action, influence the nature of perception, and incorporate themselves into the fabric of memory and identity. DeLillo is a phenomenologist of the contemporary technoscape and an ecologist of our new kind of natural habitat. Through a close reading of four DeLillo novels, Technology and Postmodern

Subjectivity in Don DeLillo's
Novels examines the variety of
modes in which DeLillo's fictions
illustrate the technologically
mediated confluence of his
human subjects and the field of
cultural objects in which they
discover themselves. The model
of interactionism between
human beings and technological
instruments that is implicit in
DeLillo's writing suggests
significant applications both to
the study of other contemporary
novelists as well as to
contemporary cultural studies.

and their neighbors prepare for the fights of their lives. They are banding together in an effort to defeat an evil which had plagued a small community for decades. The post-apocalyptic modern classic with an introduction by novelist John Banville. In a burned-out America, a father and his young son walk under a darkened sky, heading slowly for the coast. They have no idea what, if anything, awaits them there. The landscape is destroyed, nothing moves save the ash on the wind and cruel, lawless men stalk the roadside, lying in wait. Attempting to survive in this brave new world,

the young boy and his protector have nothing but a pistol to defend themselves. They must keep walking. Winner of the Pulitzer Prize for Fiction, *The Road* is an incandescent novel, the story of a remarkable and profoundly moving journey. In this unflinching study of the best and worst of humankind, Cormac McCarthy boldly divines a future without hope, but one in which, miraculously, this young family finds tenderness. An exemplar of post-apocalyptic writing, *The Road* is a true modern classic, a masterful, moving and increasingly prescient novel.

WHAT WOULD YOU DO if a voice was screaming in your head - GET READY . . . for a catastrophic event of epic proportions . . . with no idea where to start . . . or how, or when? This is a true story, it just hasn't happened yet.

From the Irish Cailleach and other shape-shifters of folk legends to modern movie “transformers”; from Ovid’s *Metamorphoses* to the moment when Gregor Samsa woke up one morning to find himself transformed into an insect in Kafka’s novella; from conversion narratives to slave narratives, turning points and transformations have always been central to literary works and to cultural developments. In fact, with Freytag’s pyramid in mind, one could claim that all literary works focus on the trope of a transformation born of a turning point, because such moments comprise the very essence and vitality of human life and culture.

But why are turning points necessarily transformational and in what way? And what brings about those turning points in language, literature, culture and human lives? These are essentially the questions the essays in this volume seek to answer. The contributors examine turning points and transformations – personal, literary and cultural – brought about through the randomness of the universe as well as through human interference, and discuss ways in which humans in general and writers in particular, through their art, experience and cope with the ineluctable results. Ernst Kasemann famously claimed

that apocalyptic is the mother of Christian theology. J. Louis Martyn's radical interpretation of the overarching significance of apocalyptic in Paul's theology has pushed Kasemann's claim further and deeper. Still, despite the recognition that apocalyptic is at the core of New Testament and Pauline theology, modern theology has often dismissed, domesticated, or demythologized early Christian apocalyptic. A renewed interest in taking apocalyptic seriously is one of the most exciting developments in recent theology. The essays in this volume, taking their point of departure from the work of Martyn (and Kasemann), wrestle

critically with the promise (and possible peril) of the apocalyptic transformation of Christian theology. With original contributions from established scholars (including Beverly Gaventa, Stanley Hauerwas, Robert Jenson, Walter Lowe, Joseph Mangina, Christopher Morse, and Fleming Rutledge) as well as younger voices, this volume makes a substantial contribution to the discussion of apocalyptic and theology today. A unique feature of the book is a personal reflection on Ernst Kasemann by J. Louis Martyn himself.

The phrase “Christian politics” evokes two meanings: political

relations between denominations in one direction, and the contributions of Christian churches to debates about the governing of society. The contributors to this volume address Christian politics in both senses and argue that Christianity is always and inevitably political in the Pacific Islands. Drawing on ethnographic and historical research in Papua New Guinea, Solomon Islands, Vanuatu, and Fiji, the authors argue that Christianity and politics have redefined each other in much of Oceania in ways that make the two categories inseparable at any level of analysis. The individual chapters vividly illuminate the

ways in which Christian politics operate across a wide scale, from interpersonal relations to national and global interconnections.

"With his novels, journalism, short stories, political activism, and travel writing, Jack London established himself as one of the most prolific and diverse authors of the twentieth century. Covering London's biography, cultural context, and the various genres in which he wrote, The Oxford Handbook of Jack London is the definitive reference work on the author" --

In a world of increasing

mobility and migration, population size and composition come under persistent scrutiny across public policy, public debate, and film and television. Drawing on media, cultural and social theory approaches, this book takes a fresh look at the concept of 'population' as a term that circulates outside the traditional disciplinary areas of demography, governance and statistics—a term that gives coherence to

notions such as community, nation, the world and global humanity itself. It focuses on understanding how the concept of population governs ways of thinking about our own identities and forms of belonging at local, national and international levels; on the manner in which television genres fixate on depictions of overpopulation and underpopulation; on the emergence of questions of ethics of belonging

and migration in relation to cities; on attitudes towards otherness; and on the use by an emergent 'alt-right' politics of population in 'forgotten people' concepts. As such, it will appeal to scholars of sociology, geography and media and cultural studies with interests in questions of belonging, citizenship and population.

Remaining in the city is not an option. Wounded and weary from their

battle at the military base, Will and Isabella want to rest and gather their strength for what lies ahead. But as the military continues to battle foreign insurgents bent on gaining control of Houston, Will and the others must flee the city or risk being pulled back into the fight. The trip out of Houston won't be easy. Danger awaits them at every turn as they make their way across East Texas. Desperate

Apocalypse

After going past the point of no return and finally reaching breaking point, the only thing Matthew Elliott can do now is start over. Matthew Elliott is a recovering man. As an ex-cop and ex-fighter, his new job teaching kids at the local community gym about drug awareness and self-defense, is a little bit of both. His new focus on helping street kids is helping him heal, and with Kira by his side, he's making strides. Brother and sister, Rueben and Claudia, are homeless kids and they're very much alone. As they strike a chord with Matt, he does everything in his power to help

them. But when Ruby and Claude need more help than he bargained for, it stops being about work, and starts being about home. The day he met Kira, Matt's life changed direction, and it's only now he realizes that everything he's been through was a lead up to this. It was never about endings. His life, his purpose, was just beginning. **Third Edition: May 2016 New publisher, new editing, new cover. No new content has been added.

Visions of the American city in post-apocalyptic ruin permeate literary and popular fiction, across print, visual, audio and digital media. *American Cities in Post-Apocalyptic Science Fiction* explores the prevalence of these representations in American culture, drawing from a wide range of primary

and critical works from the early-twentieth century to today. Beginning with science fiction in literary magazines, before taking in radio dramas, film, video games and expansive transmedia franchises, Robert Yeates argues that post-apocalyptic representations of the American city are uniquely suited for explorations of contemporary urban issues. Examining how the post-apocalyptic American city has been repeatedly adapted and repurposed to new and developing media over the last century, this book reveals that the content and form of such texts work together to create vivid and immersive fictional spaces in ways that would otherwise not be possible. Chapters present media-specific analyses of these

texts, situating them within their historical contexts and the broader history of representations of urban ruins in American fiction. Original in its scope and cross-media approach, *American Cities in Post-Apocalyptic Science Fiction* both illuminates little-studied texts and provides provocative new readings of familiar works such as *Blade Runner* and *The Walking Dead*, placing them within the larger historical context of imaginings of the American city in ruins.

you open. They'll feed on you . . .

When the sickness came, every parent, policeman, politician - every adult - fell ill. The lucky ones died. The others are crazed, confused and hungry. Only children under fourteen remain, and they're fighting to survive. Now there are rumours of a safe place to hide.

And so a gang of children begin their quest across London, where all through the city - down alleyways, in deserted houses, underground - the grown-ups lie in wait. But can they make it there - alive?

In this sixth book of the series, an unexpected turn of events deals the rebuilding effort a near deadly blow as the United States Government, in the form of a FEMA occupying force, descends upon Savannah, Tennessee.

perspectives on identity and religion in American culture, offering a look at how cultural narratives can be used to work through trauma. Cultural narratives have long played a valuable role in mediating difficult and politically sensitive topics. Christina Wilkins addresses how the figure of the vampire is used in modern narratives and how it has changed from previous incarnations, particularly in American narratives. The vampire has been a cultural staple for centuries but the current conception of the

figure has been arguably Americanized with the rise of the modern American vampire coinciding with the aftermath of 9/11. Wilkins investigates changes evident in cultural representations, and how they effectively mediate the altered approach to issues of trauma and identity. By investing metaphorical tropes with cultural significance, the book offers audiences the opportunity to consider new perspectives and prompt important discussions while also illuminating changes in societal attitudes.

This book examines the widespread use of postapocalyptic fantasies in American literary texts in the early nineteenth century. This collection of essays examines how the sense of crisis that occasionally seems to overwhelm us directs and transforms Canadian and Quebec writings in English and French, and conversely, how literature and criticism set out to counterbalance the social, economic, and ideological insecurities we live in. Ce recueil de textes étudie les manières dont le

sentiment de crise qui peut parfois sembler nous submerger, oriente et transforme les écrits canadiens et québécois d'expressions anglaise et française, et inversement, comment la littérature et la critique s'efforcent de contrebalancer les insécurités sociales, économiques et idéologiques dans lesquelles nous vivons. Besides analyzing the dystopian shift in popular culture, Joustra and Wilkinson also suggest how Christians can live faithfully and with integrity in such a cultural context.
