The issue is that no matter the input, if `sentence == stored_username[0:]` and `sentence2 == stored_password[0:]`: returns false, correct? This is because you are checking equality between the input and the list, which will always return false, i.e. `'jason' == ['jason' , 'nicole', username]` will always return false. To fix this, the `in` operator can be used, i.e.: if `sentence in stored_username ...`
