Why is the pencil used in drawing a line in paper ...

Why Use Pencil On

Chromatography A pencil is used to draw lines on the paper because the ink can smear and interfere with the chromatography and the ink will dissolve in the chromatography solvent. If you drop a ball of paper and... Why is the pencil used in drawing a line in paper ...

Why Use Pencil On

Chromatography Paper

why was a pencil used to mark the chromatogram and not a ballpoint or ink pen? Explain why the cation samples are

Get Free Why Use Pencil On Chromatography Paper

repeatedly spotted and dried on the chromatogram. Part B.3.

1) Why is a pencil used to mark the chromatogram and not a ...

Because it is a solution, some of the components of the ink may be soluble in the solvent you are using in your chromatography, in which case the ink mark will spread as the solvent front advances. The easiest way to find the answer to this question is to try it with various inks from various pens as well as marks from several pencils.

Get Free Why Use Pencil On Chromatography Paper

why do we use pencil for paper chromatography

Because most pens have pigments/inks which will dissolve in the chromatography solvent. The graphite from a pencil lead is insoluble so won't spread and spoil your chromatogram.

Why do we use pencil instead of pen in Chromatography ...

Paper chromatography. 1. Spots of ink or plant dye are placed on a pencil line Phases. Chromatography relies on two different 'phases': the mobile phase. is the solvent. that moves ...
